ADAMAS UNIVERSITY
B.A.(Honours) in Media and Communication
SEMESTER – I

| | English Communication | L | T | P | C |
|--------------------------------|------------------------------|---|---|---|---|
| | | 1 | 1 | 0 | 2 |
| Pre-requisites/Exposure | Basic knowledge of English | | | | |
| Co-requisites | - | | | | |

Course Objectives

1. To introduce the concept of communication and imaginative thinking.
2. To acquaint the students with the newest techniques and formats of different types of communication.
3. To enhance the potential of the students.
4. To enable the students to stimulate their thinking and enhance their presentational skills.

Course Outcomes

On completion of this course, the students will be able to

- CO1. **Label** the dynamics of communication practices.
- CO2. **Outline** the various technicalities of communicating in English.
- CO3. **Apply** the knowledge concerning the mock interviews.
- CO4. **Classify** the intricacies of English grammar
- CO5. **Assess** how to write in English.
- CO6. **Evaluate** the various aspects of communication.

Catalog Description

English Communication course aims at empowering students with the power of Language by helping them develop the skills of presentation and performance. At the same time an average student gains access to the basics of Grammar and the dynamics of language and message conveyance. Students are encouraged to think with imagination, write or speak with their own linguistic abilities and engage in further reading and conversational styles. They become better acquainted to deal with interviews and screening processes.

Course Content

Unit I 5 Lecture Hours

Introduction, relevance of English language, different theories of Communication.

Unit II 5 Lecture Hours

Communication verbal and nonverbal, Explanation of elements of written communication

Unit III 5 Lecture Hours

Concepts of communication, intra and inter personal, kinesics, vocalics, paralanguage.

Unit IV 5 Lecture Hours

Barriers of communication, linguistic, attitudinal and environmental.

Unit V 5 Lecture Hours

Speaking skills, reading and understanding.

Unit VI 5 Lecture Hours

Presentational skills and mock interviews and demonstrative skills.

Recommended Readings

1. *Fluency in English* - Part II, Oxford University Press, 2006.
2. *Business English*, Pearson, 2008.
3. Strunk Jr, William and White, E.B; *The Elements of Style*; 4th Edition; Longman; 1999
4. *Language, Literature and Creativity*, Orient Blackswan, 2013
5. *Language through Literature* (forthcoming) ed. Dr. Gauri Mishra, Dr Ranjana Kaul, Dr Brati Biswas
6. Wren, P.C. and H. Martin. *High School Grammar and Composition*. New Delhi: S Chand, 2017

Modes of Evaluation: Quiz/Assignment/ presentation/ extempore/ Written Examination Examination Scheme:

| HJM11001 | Journalism Basics | L | T | P | C |
| Version 1.0 | | 3 | 1 | 0 | 4 |
| Pre-Requisites/Exposure | Basic knowledge of Journalism | | | | |
| Co-Requisites | - | | | | |

Course Objectives

1. To administer platform-agnostic multimedia journalistic skills in various positions within the broader media and communication industry.
2. To practice informed decision-making in personal and professional journalistic endeavours.
3. To apply meticulous strategic methods to optimize time and cost in journalistic practices.
4. To plan stories in advance and allocate resources accordingly based on the platform the story is being covered for.
5. To understand the media laws and ethical considerations, effective news coverage requirements and its strategic aspects in the broader media and communication industry.

Course Outcomes

On completion of this course, the students will be able to

- CO1. **Label** the dynamics of the news media.
- CO2. **Outline** the various technicalities of journalistic reporting.
- CO3. **Apply** the knowledge concerning the various technicalities of news editing.
- CO4. **Classify** the intricacies of headline writing and intro writing.
- CO5. **Assess** how to write news stories for media.
- CO6. **Evaluate** platform-agnostic multimedia content.

Catalog Description

Journalism Basics is the entire process involved with the creation of platform-agnostic multimedia content. This essentially concerns the collection of news, the processing of news and the conversion of raw news pieces into final published news stories. In the process, a lot of activities happen – news collection, news editing, news designing and news publication. The course will be delivered through a healthy mix of classroom lectures, practical sessions and on-the-field exercises. In the process, the learners will be exposed to PowerPoint Presentations, printed stories and news case studies. Experts from the field from all across the platform will be called for delivering expert lectures on various aspects of journalism. Workshops will be conducted where the learners will learn the intricacies of journalism by doing. A solid backgrounding in Journalism is a sine-qua-non for any aspiring journalist even if he/ she is going for a career in television, radio or new media journalism.

Course Content

Unit I: 5 Lecture Hours

What is Journalism? What are the Traditional and Contemporary Definitions of Journalism? What are the Roles and Responsibilities of a Journalist? – A Short History of Journalism – Development of the Press in Europe, America and India – Role of the Press during the Indian Freedom Struggle.

Unit II: 5 Lecture Hours

What Is News? What Are the Various Definitions and Elements of News? What Is the Relevance of News in the Contemporary Socio-Cultural Milieu? – News Values, News Structure & News Ethics – Sources of News – The Different Types of News Sources – The Pre-Eminence and Cultivation of News Sources – What is Reporting? Who Is a Reporter? What Are the Fundamental Functions and Traits of a Reporter?

Unit III: 5 Lecture Hours

A Basic Introduction to the Various Types of News – Crime, Civic, Political, Business, Accident & Disaster, Legal, Conflict & War, International, Sports, Entertainment, Development and Weather – Understanding the Differences between News and Views – The Blurring Lines between News and Views in Contemporary India – Interpretative and Investigative Reporting – Purposes and Relevance – Role of Interpretative Reporting in Contemporary India.

Unit IV: 5 Lecture Hours

Interviewing – Types, Purposes and Relevance – Hierarchical Structures in Different News Organization – Work-flow in News Organizations – Characteristics of Print News, Television News, Radio News, Cyber News, Multimedia News and Mobile News.

Unit V: 5 Lecture Hours

Content Development – **Web Content Development** – Purpose and Contemporary Relevance – Who Is a Content Designer? What Are the Basic Guidelines to be Followed for Content Designing?

Unit VI: 5 Lecture Hours

What is Instructional Design? History of Instructional Design – **Career Options for an Instructional Designer.**

PRACTICAL: (30 Practical Hours)

1. Practical on Writing News.
2. Practical on News Identification.
3. Practical on Newspaper News Analysis.
4. Practical on Magazine News Analysis.
5. Practical on Television News Analysis.
6. Practical on Cyber News Analysis.
7. Practical on Mobile News Analysis.
8. Practical on Developing Content.

| DGS11001 | Design Thinking | L | T | P | C |
| Version 1.0 | | 2 | 0 | 0 | 2 |
| Pre-Requisites/Exposure | Basic knowledge of design thinking | | | | |
| Co-Requisites | - | | | | |

Course Objectives

1. To enable students to acquire knowledge, imagination and be more assertive on opinions on problems in society.
2. To enable students to learn basics of research, data collection, analysis, brainstorming to find solutions to issues.
3. To make them understand Design Thinking methodologies to problems in field of study and other areas as well.
4. To help students to understand future Engineering positions with scope of understanding dynamics of working between inter departments of a typical OEM.

Course Outcomes

On completion of this course, the students will be able to

- CO1. **Examine** design thinking concepts and principles
- CO2. **Practice** the methods, processes, and tools of design thinking
- CO3. **Apply** the Design Thinking approach and model to real world scenarios
- CO4. **Analyze** the role of primary and secondary research in the discovery stage of design thinking.
- CO5. **Define** different design ideas.
- CO6. **Outline** tools of design thinking.

Catalog Description

Design thinking course is a completely online course offered to the first year UG programs across all streams. This course is designed to help understand the steps followed in the process of designing a solution to a problem.

Course Content

UNIT I: WHAT IS DESIGN THINKING

2 hours

Designers seek to transform problems into opportunities. Through collaboration, teamwork, and creativity, they investigate user needs and desires on the way to developing human-centered products and/or services. This approach is at the very heart of design thinking.

UNIT II: THE DESIGN THINKING MODEL

2 hours

A tool that helps guide you along a design thinking path. The model does this by providing a series of activities that that will help you effectively design a product, service or solution to a user's need. The model presents the approach as a process, allowing us to look at each step – or phase – along the journey to the development of a final design.

UNIT III: PHASE 1: DISCOVER

4 hours

Begin the design thinking process with the Discover phase, where you will identify the specific problem your design is intended to solve, as well as important usability aspects from those who will use your design. Discovery can be performed through a variety of different research methods which you will learn in this module.

UNIT IV: PHASE 2: DEFINE**4 hours**

In the Define phase, you come to understand the problem. We often refer to this as framing the problem. You can do this by using a variety of tools, including storytelling, storyboarding, customer journey maps, personas, scenarios, and more.

UNIT V: PHASE 3: DEVELOP**4 hours**

Turn your attention to solving the problem. In this phase you brainstorm custom creative solutions to the problems previously identified and framed. To do this, you conceptualize in any way that helps, putting ideas on paper, on a computer, or anywhere whereby they can be considered and Explained.

UNIT VI: PHASE 4: DELIVER**4 hours**

This phase is all about testing and building concepts. Here you take all of the ideas that have been Explained to this point and bring them a little closer to reality by building a concept; something that makes it easier for a user to experience a design. This concept is referred to as a prototype.

UNIT VII: PHASE 5: ITERATE**4 hours**

You will test the prototype of your design solution, collecting and acting on feedback received. These actions may mean minor or major revisions to your design, and are repeated as often as necessary until a solution is reached. Tools such as focus groups and questionnaires are used to help you collect feedback that can help with your final design.

UNIT VIII: BEYOND DESIGN THINKING**2 hours**

The Design Thinking Model is a tool that helps guide you along a design thinking path. The model does this by providing a series of activities that that will help you effectively design a product, service or solution to a user's need. The model presents the approach as a process, allowing us to look at each step – or phase – along the journey to the development of a final design.

| HJM13003 | GRAPHICS AND SOCIAL MEDIA | L | T | P | C |
| Version 1.0 | | 1 | 1 | 4 | 4 |
| Pre-requisites/Exposure | Basic knowledge of Graphics | | | | |
| Co-requisites | - | | | | |

Course Objectives

1. To develop and understanding about various steps of graphic designing.
2. To describe the scope and characteristics of graphic designing.
3. To operate a graphic software and creating design.
4. To develop and understanding brand portfolio.

Course Outcomes

On completion of this course, the students will be able to;

- CO1. **Define** the dynamics of graphic designing.
- CO2. **Explain** the basic rules of graphic designing.
- CO3. **Apply** the techniques of using software to create new designs.
- CO4. **Examine** the sense of color while designing graphics.
- CO5. **Determine** the elements of graphic designing.
- CO6. **Evaluate** ethics and copyright issues while working with designs.

Catalogue Description

Graphic Design is one of the most versatile fields in the arts sector. Graphic design is a craft where professionals Evaluate visual content to communicate messages. etc. The field is considered a subset of visual communication and communication design, but sometimes the term "graphic design" is used synonymously. Graphic designers Evaluate and combine symbols, images and text to form visual representations of ideas and messages. Graphic designing is an ever-blooming field with numerous job opportunities as well as business opportunities. Various media agencies and news agencies hire designer to post on their news channels, newspapers, magazines and websites.

Course Content

Unit I: 8 Hours

Fundamentals of Graphics: Introduction to Graphics; Understanding of Graphics; Language of Graphics; The History of Graphic Design; The Future & Scope of Graphic Designer; The Concept about Modern Graphics; Modern Equipment for Graphics

Task: Study the history of art and understand the similarities and dissimilarities among the significant artefacts.

Unit II: 8 Hours

Basics of Design: Elements of Graphic– Line, Shape, Color, Texture & Typography; Principles of Design – Balance, Value, Space, Contrast, Emphasis/Dominance, Harmony, Movement/Rhythm, Proportion; Repetition/Pattern, Unity, Variety and Hierarchy.

Task: Draw five designs with line and five designs with shape.

Unit III: 8 Hours

Color Strategy : Sense of Color; Use of Color in Graphic Design; Color Mixing Theory; Color Using Formula; Color Board Making; RGB and CMYK Color Model.

Task: Adopting color from nature, doing color matching and applying color formula

Unit IV: 8 Hours

Learning CorelDraw: Usage of Different Tools in CorelDraw; Working with Lines, Shapes, Brushes in CorelDraw; Understanding the Color Palette; Applying Design Theory; Preparing Designing Layout in CorelDraw.

Task: Creating Emojis, flowers, visiting cards and Logos.

Unit V: 8 Hours

Adobe Illustrator: Usage of Different Tools in Adobe Illustrator, Working with Typography; The Science of Fonts; Working with Typographic Guidelines; Learning to Evaluate Branding for Business Including a Commercial and Magazine Advertisements.

Task: 3D font making,

Unit VI: 8 Hours

Creating Images for Print &Web: Working with Image (Ethics; Copyright Laws.); Working with Bitmaps; Raster vs Vector; Export & Print Making.

Task: Making product boxes and calendars and designing book covers.

Practical Lessons 24 Practical Hours

Portfolio Making (Final Project) Evaluate your own design portfolio – Select a brand name and make its logo, letterhead, bill book, visiting card, poster, advertisement, leaflet, banner for social media, T-shirt design, cap design and bag cover.

|--------------------------------|--------------------------------|---|---|---|---|
| HJM13004 | Introduction to Imagery | L | T | P | C |
| Version 1.0 | Introduction to Imagery | 1 | 1 | 4 | 4 |
| Pre-requisites/Exposure | Basic knowledge of photography | | | | |
| Co-requisites | - | | | | |

Course Objectives

1. To develop an understanding about various steps involved in photography.
2. To describe the scope and characteristics of photography.
3. To operate a fully manual camera demonstrating how light and time affect photographs.
4. To critique and Explain photographic images (experts and others). Students will study the work of numerous recognized photographers as well as images produced by class members.

Course Outcomes

On completion of this course, the students will be able to:

CO1. **Define** the dynamics of photography.

CO2. **Explain** the basic rules of imagery.

CO3. **Apply** the knowledge of digital SLR cameras, lighting, postproduction, and printing.

CO4. **Examine** the basics of moving image and cinematography.

CO5. **Determine** the ways of managing a successful photography business.

CO6. **Evaluate** research techniques for documentary subjects or news stories visualized through still and moving images.

Catalogue Description

Introduction to Imagery is one of the most versatile fields in the arts sector. The application of photography is in different fields such as fashion, journalism, entertainment, science etc. Skilled photographers are required in different firms including news agencies, electronic media, modelling agencies, wildlife photography, etc. Photography courses enable the candidates to understand the utility of different camera parts, working out the lights while clicking pictures and the art of taking candid shots. Other aspects that the candidates can learn from the programme are studio lighting, portrait photography and designing portfolios. Photography is an ever-blooming field with numerous job opportunities as well as business opportunities. Candidates can also start their own private photo studios to offer portrait clicking and creating portfolios of potential clients.

Course Content

Unit I: 2.5 Lecture Hours

Prism and Light Spectrum – VIBGYOR – Speed of Light – Reflection – Refraction – Human Eye and Camera Lens – Comparisons and Differences – Work of Muybridge and Edison – Eastman – Bioscope.

Unit II: 2.5 Lecture Hours

Forced Perspective – Hyper Focal Distance – Fore Shortening – Lens Aberrations – Spherical, Optical, Astigmatism – Inner Reflection – Chromatic Aberrations – Corrections – Lens Elements and Lens Barrel.

Unit III: 2.5 Lecture Hours

Pinhole Camera – Camera Obscura – SLR – TLR – Parallax Error – Celluloid Camera, Electronic Camera Lens – Normal Lens – Wide Angle Lens – Telephoto Lens – Fixed Focus Lenses – Image Formation – Analog to Digital – Block Lenses and Focus Points – Depth of Field and Depth of Focus – Deep Focus Lenses – Variable Focus Lens – Merits and Demerits – Lens and Perspectives – 3D Lenses.

Unit IV: 2.5 Lecture Hours

Angle and Lenses – Eye Level, High Angle, Low Angle, Bird's Eye View and Worm's Eye View – Image Dynamization – Use of Camera Movements – Trolley Dolly, Crane, Boom Steady Cam, Jib etc. – Remote Operation – Lightweight Digital Cameras – Lens and Movements – Optical Movements – Standardisation of Aspect Ratio – Academy Ratio – Normal, Screen – Wide – Cinemascope – 70mm etc.

Unit V: 2.5 Lecture Hours

Camera and Still Pictures – Illusion of Movement – Persistence of Image and Synthesis of Motion – Framing Space – Centrifugal and Centripetal Influences – Painters Frames – Vertical, Horizontal, Conical, Circular etc. – Binary Vision – Vanishing Point – Golden Point – Celluloid Camera as Recording Machines – Standardisation of Frames Per Second – Silent 16 Frames Per Second – Talkie 24 Frames Per Second.

Unit VI: 2.5 Lecture Hours

Basic tool of Photoshop, Basic Photo editing, color correction, resizing, working with pixel, cut out making.

Practical Lessons

30 Practical Hours

1. Practical on Depth of Field and Depth of Focus – Variable Focus Lens (Zoom Lens) – Image Quality of Zoom Lenses – Filters, Gels and Corrections.
2. Practical on Lens and Image Perception – Different Types of Lenses – Normal, Wide and Tele Lenses – Fixed Focus Lenses and Creation of Images – Lens and Focus – Image Qualities of Various Block Lenses – Fore – Shortening and Forced Perspective.
3. Single Frame Photography, Slow Motion, Fast Motion etc.

4. Practical Lessons Based on Composition, Movement, Lensing, Movement etc. – Object and Camera Movements with Block and Zoom Lenses – Vertigo Effect – Analysis of Images at Aesthetical Level
5. Operational Practical Lessons on Digital Movie Camera – Practical Lessons Based on the Concept of Imaginary Line (180-Degree Rule) – Continuity Concepts – Image Sizes – Lighting for Large Screens – Continuity and Image Quality of Various Resolution Cameras.
6. Shooting – A 90-Second Continuous Shot with Artists & Camera Move to be Submitted for Assessment.
7. Shoot the breakdown of a continuous shot into various shots. Submit for Assessment. (Each student must have separate situations executed on the above. No story is required. Only the visual effect through a single shot and the breakdown of shots are required.)

Reference Books

| HJM11006 | Print Media Journalism | L | T | P | C |
| Version 1.0 | | 5 | 1 | 0 | 6 |
| Pre-Requisites/ Exposure | Basic knowledge of Journalism | | | | |
| Co-Requisites | - | | | | |

Course Objectives

1. To administer platform-agnostic multimedia journalistic skills in various positions within the broader media and communication industry.
2. To practice informed decision-making in personal and professional journalistic endeavours.
3. To apply meticulous strategic methods to optimize time and cost in journalistic practices.
4. To plan stories in advance and allocate resources accordingly based on the platform the story is being covered for.
5. To understand the media laws and ethical considerations, effective news coverage requirements and its strategic aspects in the broader media and communication industry.

Course Outcomes

On completion of this course, the students will be able to

- CO1. **Label** the dynamics of the print news media.
- CO2. **Outline** the various technicalities of print media reporting.
- CO3. **Apply** the knowledge concerning the various technicalities of print news editing.
- CO4. **Classify** the intricacies of headline writing and intro writing.
- CO5. **Assess** how to write news stories for newspapers and news magazines.
- CO6. **Evaluate** a newspaper and a news magazine.

Catalog Description

Print Media Journalism is the entire process involved with the creation of a newspaper or a news magazine. This essentially concerns the collection of news, the processing of news and the conversion of raw news pieces into final published news stories. In the process, a lot of activities happen – news collection, news editing, news designing and news publication. Print Media Journalism is one of the most important areas in the study of journalism. The course will be delivered through a healthy mix of classroom lectures, practical sessions and on-the-field exercises. In the process, the learners will be exposed to PowerPoint Presentations, printed stories and news case studies. Experts from the field from all across the platform will be called for delivering expert lectures on various aspects of journalism. Workshops will be conducted where the learners will learn the intricacies of journalism by doing. A solid backgrounding in Print Media Journalism is a sine-qua-non for any aspiring journalist even if he/ she is going for a career in television, radio or new media journalism.

Course Content

Unit I: 5 Lecture Hours

The Dynamics of News: What is News? – What Are the Various Definitions and Elements of News? – What is the Relevance of News in the Contemporary Socio-Cultural Milieu? – The Significance of News in a Country like India – The Debate between News as a Commodity and News as a Social Product – Difference between Fact and Truth in the Context of News – How Journalism Is Primarily about Facts – News Values, News Structure and News Ethics – The Inverted Pyramid Structure of Writing News – Understanding the Drift of the Indian English Media – Comprehending the Essential Differences between News Published by English Media and Vernacular Media.

Unit II: 5 Lecture Hours

Print Media Reporting: What Is Print Media Reporting? – Who Is a Reporter? – What Are the Fundamental Functions and Traits of a Reporter? – A Reporter as against a Writer – The Differences between Reporting News and Writing a Piece of Literature – Political Neutrality and Objectivity to be Exercised by a Reporter.

Unit III: 5 Lecture Hours

Various Types of News: A Basic Introduction to the Various Types of News – Crime, Civic, Political, Business, Accident and Disaster, Legal, Conflict and War, International, Health, Culture, Sports, Entertainment, Development and Weather – Different Approaches to Handle Different Types of Stories.

Unit IV: 5 Lecture Hours

News Writing and News Editing: Differences between Writing and Editing – Expression and Communication – Connection between Writing and Reading – Connection between Writing and Reading – Respecting the Reader – Listening – Basics of Editing and Proofreading – Editing as the Most Important Process in Making News – The Various Processes Involved in News Editing – The Process of Proofreading – The Significance of Proofreading.

Unit V: 5 Lecture Hours

The Dynamics of News Editing: Do We Still Have a Sub-Editor in the Truest Sense of the Term? – The Changing Role of the Sub-Editor inside the Newspaper and the News Magazine Office – How Is Editing Done? – The Subtle Differences between Editing, Rewriting and ‘Manufacturing’.

Unit VI: 5 Lecture Hours

Headlines and Agencies: Headlines – Importance of Headlines – Types of Headlines – Functions of Headlines – Writing Headlines for Newspapers and News Magazines – The Ideal Headline – The Dos and Don’ts to be Followed While Writing Headlines for a News Story – Elements of Editing Types of Copy (Reports and Feature) – Grammar and Punctuations – Usage and Meaning – Testing and Slotting – Agency Copy – News Selection – Gate Keeping.

Practical Lessons: 30 Practical Hours

1. Lessons on Field Reporting.
2. Lessons on News Selection.
1. Lessons on Headline and Intro Writing.
2. Lessons on Editing.
3. Lessons on Writing News Stories.
4. Lessons on Writing Feature Stories.

| Version 1.0 | | 3 | 1 | 0 | 4 |
| Pre-Requisites/ Exposure | Basic knowledge about the media | | | | |
| Co-Requisites | - | | | | |

Course Objectives

1. To administer linkage between the process and elements of interpersonal and mass communication.
2. To analyse the various aspects of basic media laws
3. To develop the knowledge of the visual message and the truth behind the image – visual literacy.
4. To plan the trends in advertising media in terms of its representation of gender and ethnicity.
5. To understand the evolution of print media and broadcast media
6. To assess the contemporary new media and multimedia

Course Outcomes

At the end of the course, the learner will be able to:

- CO1. **Label** the process and elements of interpersonal and mass communication.
- CO2. **Outline** the various aspects of basic media laws.
- CO3. **Classify** and understand the visual message and the truth behind the image – visual literacy.
- CO4. **Apply** the understanding of the advertising media in terms of its representation of gender and ethnicity.
- CO5. **Assess** print media and broadcast media.
- CO6. **Evaluate** new media and multimedia

Catalogue Description

What is media literacy, and why is it important? To make students develop certain essential skill set in competitive world.

1. Learn to think critically.

Become a smart consumer of products and information.

2. Recognize point of view.
3. Evaluate media responsibly.
4. Identify the role of media in our culture.
5. Understand the author's goal.

Course Content

UNIT – I **10 Lecture Hours**

Define the Different Elements of Communication – The Communication Loop: Sender/ Encoder, Message, Medium, Receiver/ Decoder, Feedback, Context, Noise – Identify Different Forms of Communication – Verbal, Non-Verbal and Visual Communication, Paralanguage.

UNIT – II

(10 Hours)

Constitutional Provisions for Press Freedom – Right to Freedom of Speech and Expression as the Basis for Press Freedom – Reasonable Restrictions on the Freedom of Speech and Expression – Right to Information – Defamation, Libel and Slander, Contempt of Court, Sedition – The Copyright Act 1957 – Trial by Media – Cyber Laws – Cyber Bullying- Cyber Security- Ethical Issues in Social Media- Media Ownership- Media Policies

UNIT – III 10 Lecture Hours

Advertising: Meaning, Definition, Types, Functions, Advertising Appeals, The Association Principle, Media Research and Advertising: How Media Researchers Determine What We See and Hear, Merchants of Cool (Video), Advertising Culture, Media Research on Advertising, Focus Groups on Advertising, Jamming Negative Land.

UNIT – IV 10 Lecture Hours

Understanding Print Media – News and Journalism – Contemporary Issues in Journalism – Paid and Fake News – The Decreasing Relevance of Print Media – The Irreplaceable Nature of Print Media – The Usage of Print Media for Other Purposes Except News.

UNIT – V 10 Lecture Hours

Understanding Broadcast Media – Radio and Its Characteristics – Television and Its Characteristics – The Usage of Broadcast Media for Various Purposes – Broadcast Media and News – Understanding Cinema and Its Various Formats – Appreciating Cinema and Understanding the Various Elements of Cinema.

UNIT – VI 10 Lecture Hours

Understanding New Media and Multimedia – Convergence as the Most Important Contemporary Concept in Media – The Platform Neutral Nature of Modern Media and Communication Content – New Media and News.

Course Objectives

1. To understand more about environmental studies.
2. To understand sustainable development.
3. To understand the different types of ecosystems.
4. To understand concepts like gender issues.

Course Outcomes

On completion of this course, the students will be able to

- CO1. **Label** the dynamics of the environment.
- CO2. **Outline** the various technicalities of renewable sources of energy.
- CO3. **Apply** the knowledge concerning the various ecosystems.
- CO4. **Classify** the intricacies of renewable fuels.
- CO5. **Assess** how to understand the concept of biodiversity.
- CO6. **Evaluate** a better environment.

Catalog Description

Environmental science incorporates the study of the physical, chemical and biological processes that take place on the Earth, as well as the social, political and cultural processes which impact the planet. Workshops will be conducted where the learners will learn the intricacies of journalism by doing. A solid backgrounding in environmental studies is a required by every person.

Course Content

Unit I: 5 Lecture Hours

Multidisciplinary nature of environmental studies; scope and importance; need for public awareness; concept of sustainability and sustainable development.

Unit II: 5 Lecture Hours

Renewable and non-renewable resources; Forest resources: Use and over-exploitation, deforestation, case studies. Timber extraction, mining, dams and their effects on forest and tribal people, Water resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems, Mineral resources: Use and

exploitation, environmental effects of extracting and using mineral resources, case studies, Land resources: Land as a resource, land degradation, soil erosion and desertification, Energy Resources: renewable and nonrenewable energy resources, fossil fuel types and their environmental impact, solar, wind, hydropower, biomass energy and geothermal energy.

Unit III: 5 Lecture Hours

Concept of an ecosystem, Structure and function of an ecosystem, Producers, consumers and decomposers, Food chains, food webs and ecological pyramids, Energy Flow. Levels of Biodiversity: genetic, species and ecosystem diversity, Values of biodiversity, India as a mega-diversity nation, Biodiversity hotspots, Threats to Biodiversity, In-situ and Ex-situ conservation of Biodiversity.

Unit IV: 5 Lecture Hours

Environmental pollution: types, causes, effects and controls; Air, water and noise pollution, Pollution case studies.

Unit V: 5 Lecture Hours

Climate change, global warming, acid rain, ozone layer depletion, nuclear accidents. Environment Laws: Environment Protection Act; Air (Prevention & Control of Pollution) Act; Water (Prevention and control of Pollution) Act; Wildlife Protection Act; Forest Conservation Act. International agreements: Montreal and Kyoto protocols and Convention on Biological Diversity (CBD).

Unit VI: 5 Lecture Hours

Human population growth: Impacts on environment, human health and welfare. Environmental movements: Chipko, Silent valley, Environmental ethics: Role of Indian and other religions and cultures in environmental conservation. Sustainable development, Water conservation, rain water harvesting, watershed management; its problems and concerns. Environmental communication and public awareness, case studies; Swachh Bharat Mission.

| Version 1.0 | | 3 | 1 | 0 | 4 |
| Pre-Requisites/Exposure | Media Literacy | | | | |
| Co-Requisites | - | | | | |

Course Objectives

1. To administer the legal dynamics of becoming media professionals.
2. To understand the various technicalities to become legal media advisors.
3. To analyse the knowledge concerning the various aspects of media laws and ethics
4. To Assess the legal anomalies in large and reputed media projects.
5. To understand the media laws and ethical considerations, effective news coverage requirements and its strategic aspects in the broader media and communication industry required to become successful media professionals.

Course Outcomes

On completion of this course, the students will be able to

- CO1. **Label** the legal dynamics of being practicing media professionals
CO2. **Outline** the various technicalities to become legal media advisors.
CO3. **Apply** the knowledge concerning the various aspects of media laws and ethics.
CO4. **Classify** the intricacies of advanced subject for further study.
CO5. **Assess** the legal anomalies in huge media projects.
CO6. **Evaluate** media constitutional expertise.

Catalogue Description

The course introduces students to a broad range of specific ethical and legal issues pertinent to various aspects of the media. The course will investigate and analyze techniques for dealing with moral problems and moral dilemmas that students may encounter in their professional lives. The course will also examine and analyze the general nature of ethical, legal and moral discourse pertaining to professional communication.

Course Content

UNIT – I (Indian Constitution) (5 Hours)

Fundamental Rights, Freedom of Speech and Expression and Restrictions – Article 19 of Universal Declaration of Human Rights, Article 19 (1)(a) and Article 19 (2) of the Indian Constitution, Freedom of Press (Case Study of the State of Uttar Pradesh vs Raj Narain Case, 1975), Right of Reply Provisions, Press Commissions, Press Council of India

UNIT – I (Indian Constitution) (5 Hours)

Fundamental Rights, Freedom of Speech and Expression and Restrictions – Article 19 of Universal Declaration of Human Rights, Article 19 (1)(a) and Article 19 (2) of the Indian Constitution, Freedom of Press (Case Study of the State of Uttar Pradesh vs Raj Narain Case, 1975), Right of Reply Provisions, Press Commissions, Press Council of India
Basic Features of Indian Constitution, Right to Privacy

UNIT – II (Press Laws – I)
(5 Hours)

Defamation, Libel and Slander, Contempt of Court, Sedition –Incitement to Violence, Hate Speech, Official Secrets Act

UNIT – III(Press Laws –II)
(5 Hours)

The Press and Registration of Books Act 1867, The Copyright Act 1957, The Working Journalist and other Newspaper Employees Act 1955, Parliamentary Proceedings Act

UNIT – IV(Media Technology and Ethical Parameters)
(5 Hours)

RTI (Case Study of Rajasthan Villagers Using RTI to End Woes, Case Study of Karnataka Villagers Insisting on Right to Food through RTI), Live Reporting and Ethics, Legality and Ethicality of Sting Operations, Phone Tapping etc. (Case Study of Tehelka, Cash for Votes Sting Operation in 2008), Code of Ethics in Journalism

UNIT – V (Media and Social Responsibility)
(5 Hours)

Ethics and Checkbook Journalism – New Roles for Journalism and Public Opinion, Trial by Media (Case Study), Economic Pressures, Media Reportage of Marginalized Sections –Children, Dalits, Tribal, Women, Regulation of the Media- State Regulation or Self-Regulation?Public Interest Litigation

UNIT – VI(Internet and Cyber Laws)
(5 Hours)

Free Speech on the Web, Cyber Laws, Ethical Issues in Social Media (IT Act 2000, Sec 66A and the Verdict of the Supreme Court), Ethics in the Digital Age

Recommended Books:

1. *Constitution of India* – By V.N. Shukla, 2017.
2. *Media Law and Ethics*– By M Neelamalar, 2009.
3. *Media Law: Its Ethics and Ethos* – By Devesh Kishor and Ganga Sagar Singh, 2016.
4. *Introduction to Media Laws and Ethics* – By Juhi P Pathak, 2014.
5. *Press Laws and Ethics of Journalism* – By P.K. Ravindranath, 2004.
6. *Digital Media Law* – By Ashley Packard, 2012.
7. *Media Law, Ethics, and Policy in the Digital Age* – By Nhamo A. Mhiripiri and Tendai Chari, 2017.

| Version 1.0 | | 3 | 1 | 0 | 4 |
| Pre-Requisites/Exposure | Basic knowledge of communication | | | | |
| Co-Requisites | - | | | | |

Course Objectives

1. To develop the knowledge of basic elements of communication.
2. To inculcate the knowledge of communication models.
3. To understand the theories of Communication.
4. To explore the probable dimensions of research in the field of journalism and mass communication.

Course Outcomes

On completion of this course, the students will be able to

- CO1. **Define** the process of communication.
- CO2. **Describe** the types and functions of communication.
- CO3. **Outline** various communication theories and models.
- CO4. **Apply** the knowledge of communication theories and models with case studies.
- CO5. **Assess** the scope of communication process.
- CO6. **Predict** the outcomes of different communication process.

Catalog Description

Communication theories considers various theoretical perspectives on communication processes. This essentially concerns the learning of the different concepts of communication, the elements and types of communication, meaning and scope of communication. This course explores basic elements in the communication process as they occur in the context of interpersonal relationships, groups and organizations, public speaking, media, and various cultural contexts.. Experts from the field from all across the platform will be called for delivering expert lectures on various aspects of communication. Workshops will be conducted where the learners will learn the intricacies of communication.

Course Content

Unit I: 5 Lecture Hours

Communication Concept Elements and Process – Defining Meaning and Scope of Communication – Types of Communication – Barriers to Communication – Function of Communication.

Unit II: 5 Lecture Hours

Models of Mass Communication – Aristotle’s Model – Lasswell’s Model – Shannon and Weaver Model – Osgood’s Model.

Unit III: 5 Lecture Hours

Theories of Communication – Dependency Theory – Cultivation Theory – Hypodermic Needle Theory – Limited Effects Theory.

Unit IV: 5 Lecture Hours

Agenda Setting Theory – Uses and Gratification Theory – Cognitive Dissonance – Agenda Setting – Knowledge-Gap Hypothesis.

Unit V: 5 Lecture Hours

Media Theories – Four Theories of the Press – Interactive Theory: One-Step Flow – Two-Step Flow (Opinion Leaders) – Multi-Step Flow – Relevance of Communication Theories to Practice – Persuasion – Perception – Diffusion of Innovations – Social Learning – Participatory Communication.

Unit VI: 5 Lecture Hours

Introducing Media Research – Meaning and Concept – Methods of Acquiring Knowledge – Types of Research: Basic-Applied-Descriptive-Analytical-Clinical-CaseStudy-Historical.

Catalog Description

Introduction to Communication considers various theoretical perspectives on communication processes. This essentially concerns the learning of the different concepts of communication, the elements and types of communication, meaning and scope of communication. This course explores basic elements in the communication process as they occur in the context of interpersonal relationships, groups and organizations, public speaking, media, and various cultural contexts.. Experts from the field from all across the platform will be called for delivering expert lectures on various aspects of communication. Workshops will be conducted where the learners will learn the intricacies of communication.

Course Content

Unit I: 5 Lecture Hours

Origin and Development of Communication, Concept and definitions of communication, Elements and process of Communication, Functions of communication

Unit II: 5 Lecture Hours

Types of communication, Barriers to communication, 7 Cs of communication, Role of communication in socialization.

Unit II 10 Lecture Hours

Models of Mass Communication – Aristotle’s Model – Lasswell’s Model – Shannon and Weaver Model – Osgood’s Model, Westley-McLean’s Mass Communication model; David Berlo’s Linear model

Unit III: 5 Lecture Hours

Normative theories: Social Responsibility and Democratic Participant media theories, Hypodermic Needle Theory. Meaning in communication; Basics of signs, symbols and codes, Normative theories: Authoritarian, Libertarian, Berlo Model, Lasswell Model.

Unit III: 10 Lecture Hours

Theories of Communication – Dependency Theory – Cultivation; Roman Jakobson’s communication model; Basic concepts of Semiology: Sign, Code, Text

Unit IV: 5 Lecture Hours

Normative theories: Social Responsibility and Democratic Participant media theories, Hypodermic Needle Theory.

Unit IV: 10 Lecture Hours

Agenda Setting Theory – Uses and Gratification Theory – Cognitive Dissonance – Agenda Setting – Knowledge-Gap Hypothesis. Phases of media society relations: Mass Society, Functionalism, Critical Political Economy, Technological Determinism, Information Society Priming-Framing-Gatekeeping-Agenda Setting); Spiral of Silence, Propaganda model. McQuail’s Four Theory of Communication and Four Models of Communication.

Unit V: 5 Lecture Hours

Normative theories Personal influence Theory, Osgood and Schramm Model.

Unit V: 10 Lecture Hours

Normative theories - Interactive Theory: One-Step Flow – Two-Step Flow (Opinion Leaders) – Multi-Step Flow – Relevance of Communication Theories to Practice – Persuasion – Perception – Diffusion of Innovations – Social Learning – Participatory Communication.

Unit V: 5 Lecture Hours

Normative theories Personal influence Theory, Osgood and Schramm Model - Agenda Setting Theory – Uses and Gratification Theory

Unit VI: 5 Lecture Hours

Shannon and Weaver’s Mathematical Theory of Communication, Redundancy and Entropy, Noise.

2. To describe the scope and characteristics of photography.
3. To operate a fully manual camera demonstrating how light and time affect photographs.
4. To critique and Explain photographic images (experts and others). Students will study the work of numerous recognized photographers as well as images produced by class members.

Course Outcomes

On completion of this course, the students will be able to:

- CO1. **Define** the dynamics of photography.
CO2. **Explain** the basic rules of imagery.
CO3. **Apply** the knowledge of digital SLR cameras, lighting, postproduction, and printing.
CO4. **Examine** the basics of moving image and cinematography.
CO5. **Determine** the ways of managing a successful photography business.
CO6. **Evaluate** research techniques for documentary subjects or news stories visualized through still and moving images.

Catalogue Description

Photography is one of the most versatile fields in the arts sector. The application of photography is in different fields such as fashion, journalism, entertainment, science etc. Skilled photographers are required in different firms including news agencies, electronic media, modelling agencies, wildlife photography, etc. Photography courses enable the candidates to understand the utility of different camera parts, working out the lights while clicking pictures and the art of taking candid shots. Other aspects that the candidates can learn from the programme are studio lighting, portrait photography and designing portfolios. Photography is an ever-blooming field with numerous job opportunities as well as business opportunities. Candidates can also start their own private photo studios to offer portrait clicking and creating portfolios of potential clients.

Course Content

Unit I: 2.5 Lecture Hours

A Brief History of Photography, Anatomy of Digital Camera & Its Types, What Is Photojournalism? Beginnings; Necessity and Significance.

Unit II: 2.5 Lecture Hours

DSLR Lens, Shutter, Diaphragm, Depth of Field, Factors Affecting DOF, Lighting, Focus, Auto-Focus, Manual Focus.

Unit III: 2.5 Lecture Hours

Meaning and Definitions of Art – Meaning of Composition – Elementary Rules of Composition – Rule of Thirds, Figures and Lines.

Unit IV: 2.5 Lecture Hours

Composing Different Types of Subjects Such as Portraits, Landscapes, Action, Macro Photography – Pictures for Newspapers and Magazines.

Unit V: 2.5 Lecture Hours

(2.5 Hours)

Photographing People; Portrait and Still, Wildlife; Environment; Sports; Landscape; Industrial Disasters; Photography for Advertising; Conflicts – War – Political and Social Photography.

Unit VI: 2.5 Lecture Hours

News Values for Pictures – Photo Essays – Photo Features; Qualities Essential for Photo Journalism; Picture Magazines.

Practical Lessons

60 Practical Hours

1. Basic camera operation such as holding the camera firmly, setting exposures manually, focusing correctly and composing a picture, releasing the shutter gently etc.

2. To learn the effects of different exposure setting in the same light condition and to learn effects of different shutter speeds and apertures.

3. To shoot a landscape, candid shots, outdoor modelling with frontal lighting and back lighting, use, macro photography.

3. To learn to use close-up lenses, shooting action shots with panning, freezing etc.

4. To learn to use Depth of Field preview.

5. To learn to shoot long exposure photography, bird photography, street photography, documentary photography, cityscape photography, nature photography, creative photography.

6. Make photo essay/ feature, portfolio photography, table-top photography and submit assignment.

7. Apply various categories of photography and submit assignment.

8. Apply the concept of photoshop and submit assignment.

1. To develop and understanding about various printing processes.
2. To develop an understanding about newspaper designing, news positioning, story treatment and layout types.
3. To operate a page designing software and creating design.
4. To develop and understanding about various layout and info-graphics.

Course Outcomes

- CO1. **Define** the printing process and the page design.
- CO2. **Describe** the page designing tools.
- CO3. **Outline** various techniques of page designing software.
- CO4. **Apply** the knowledge of multimedia design.
- CO5. **Assess** the scope of printing as a process.
- CO6. **Predict** the the elements and basic rules of multimedia design and info-graphics.

Catalogue Description

Page technology and design is one of the most versatile fields in the arts sector. By creating a good layout a designer can easily communicate with mass. This is a part of graphic design. The field is considered a subset of visual communication and communication design, but sometimes the term "page design" is used synonymously. Page designers Evaluate and combine Typography, Image, symbol and shape to form visual representations of ideas and messages.

This course enables the candidates to understand fundamentals of page design and the printing technology. Other aspect of this course is candidates can learn the use of different page designing software.

Printing Technology and Page Designing is an ever-blooming field with numerous job opportunities as well as business opportunities. Various media agencies and news agencies hire designer to Evaluate news papers, magazines, journals, e-magazines, e-books or web portals. Apart from that, there is a constant demand for aesthetic designer who can Evaluate unique design and illustration about trendy theme other such themes. Following are some of the popular jobs that candidates can look into after pursuing graphic designing courses:

- Layout Artist
- Page Designer
- Digital content designer
- Typography Artist
- Freelancers
- Stock designer

Course Content

Unit I: 6 Lecture Hours

Basics of Print Media: Introduction to Print Media; Introduction to Various Printing Processes; Various Types of Newspaper and News Print; Various Types of Papers and the Usage of Papers in Different Publications; Types of News; Understanding of News Value.

Unit II: 6 Lecture Hours

Basics of Design: Introduction of Layout, Basic Principles of Layout; Layout Types; Elements of Layout, Lines of Newspaper (Headline, Dateline, Deadline, By-Line, Folio Line, Skyline etc.); Basic Terminologies- Slugs, Highlights, Banners, Info-graphics etc.; Types of Advertisements; News Selection, News Positioning and Layout Designing

Unit III: 6 Practical Hours

Learning QuarkXPress: Introduction to QuarkXPress; Tools of QuarkXPress; Layout Making; Creation of Masthead; Creating Text Box and Importing Text on a Page; Creating Image Box and Inserting Image; Typography and Graphic Art.

Unit IV: 6 Practical Hours

Visual Communication and Colors: Use of Color; Color Model – RGB, CMYK; Color Board Making; Use of Advance Color and Texture; Creation of Slugs, Blurbs, Info-graphics; How to Evaluate Highlight.

Unit V: 6 Practical Hours

Typography: Introduction to Photography; Photo Selection and Editing; Placement of Photos and Placement of Caption; Cut-out Making and Promo/ Ear Panel Creation; Introduction to Magazine Layout.

Unit VI: 6 Practical Hours

Creating Images for Print & Web: Advertisement Placing; Working with Layers, Library; Final Export and PDF Making; Modern Newspaper Layout in the Age of Globalization; E-Paper Designing

Practical Project 24 Practical Hours

Portfolio Making –Evaluate your own Design portfolio – Design four-page Thematic Newsletter –Select a subject and make a Magazine (minimum 8 pages without front and back cover page)

| HJM13016 | Broadcast Technologies | L | T | P | C |
| Version 1.0 | | 1 | 1 | 4 | 4 |
| Pre-requisites/Exposure | Basic knowledge of broadcast media | | | | |
| Co-requisites | - | | | | |

Course Objectives

1. To develop an understanding about various steps involved in broadcast technologies.
2. To describe the scope and characteristics of post-production.
3. To operate a fully manual Satellite and Cable Broadcasting.
4. To critique and Explain Digital Broadcast Technology.

Course Outcomes

On completion of this course, the students will be able to;

- CO1. **Define** the process of broadcast technology.
CO2. **Describe** the video editing and live television production.
CO3. **Outline** various techniques of broadcast technology software.
CO4. **Apply** the knowledge of audio and visual materials in the overall broadcast paradigm.
CO5. **Assess** the scope of broadcasting as a process.
CO6. **Predict** the essentials of post-production.

Catalogue Description

Online editing is the processing of video or graphic editing which is done as the final step of video making, and **Live video editing** is where there are various cameras at various angles and position, capturing single or multiple subjects and the footage is routed through a vision mixing device and edited and transmitted in **real-time**. **Live television** is a **television** production broadcast in real-time, as events happen, in the present.

Briefly discuss various kind of production - live show etc. Understanding about Video and Audio Console. Setup multi Camera for live show, and camera position with angle. to know about different type of cable and their function, Talkback System, PSA, function of ear phone, Different type of microphone, to familiar with MCR and PCR, setup with function, Studio setup, Lighting set up and editing Software.

Video editing careers can be very lucrative for the right people. There has been increased popularity and demand for video editor in various Channels as well as Production Houses and Television Studio Editor, and program Designer, Film Editor, Senior Video Editor, Live programming editor, Production Manager, program Coordinator, Camera Person.

Course Content

Unit I: **2.5 Lecture Hours**

Television as a Medium of Communication – Its Strengths and Weaknesses; Roles and Functions of Television in the Society; Media Richness and the Power of Moving Images; Global Television and Cultural Imperialism; Early Experiments with TV in India; TV for

Sociocultural Development; Satellite Instruction Television Experiment; Public Service Broadcasting and Doordarshan.

Unit II: 2.5 Lecture Hours

What Is an Image? – Electronic Image, Television Image, Digital Image – What Is a Visual? (Still to Moving), Visual Culture, Characteristics of Television as a Medium – Concepts of Sound: Scope, Sound Culture, Types of Sound: Sync, Non-Sync, Natural Sound, Ambience Sound, Introductions to Microphones, Characteristics of Radio as a Medium.

Unit III: 2.5 Lecture Hours

Online Editing, MCR, PCR, Hosting, Sound Mixing, CG, Cloud Stemming, Third-Party Stemming: Up Stemming, Down Stemming, Bit Rate Ratio.

Unit IV: 2.5 Lecture Hours

Audio: XLR, PHONO, RC Connector, Joiner, Cable. Video: BNC, HDMI, VGA, RC Connector, Joiner, Cable – Concept on Male Female Connector, Fibre Optics, Concept of Satellite, Earth Station.

Unit V: 2.5 Lecture Hours

Basics of a Camera (Lens & Accessories), Electronic News Gathering (ENG) & Electronic Field Production (EFP) (Concept), Visual Grammar: Camera movement, Types of Shots, Visual –Elements of a Radio News Story: Gathering, Writing/ Reporting; Elements of a Radio News Bulletin.

Unit VI: 2.5 Lecture Hours

Elements of a Television News Story: Gathering, Writing/ Reporting; Elements of a Television News Bulletin, Working in a Radio News Room.

Practical Lessons 60 Practical Hours

1. News Capsule
2. Live production

Course Objectives

1. To comprehend the basics of digitization and digital media.
2. To know about the digital society.
3. To understand digital activism.
4. To assess the technologies associated with digital media.

Course Outcomes

On completion of this course, the students will be able to

- CO1. **Define** the meaning and concept of new media.
- CO2. **Describe** the theories of new media.
- CO3. **Outline** various new media theories and models.
- CO4. **Apply** the knowledge of new media in understanding the digital society and post-humanism.
- CO5. **Assess** the scope of Information and Communication Technology.
- CO6. **Predict** the outcomes of digital politics and social resistance.

Catalog Description

New media studies is a course of study designed to engage students from all fields in an exploration of new and emergent media, preparing them for achievement and scholarship in multifarious new media environments. The program fosters learning to manage change in media, creating effective expressions (communications, creative works, applications in digital environments, and exploring the interrelationship of new media with other fields of study to understand the relationships between technology and culture. Experts from the field from all across the platform will be called for delivering expert lectures on various aspects of communication. Workshops will be conducted where the learners will learn the intricacies of the new media.

Course Content

Unit I:

5 Lecture Hours

Introduction to Digital Media: Meaning and Concept – Digital Media Technology – Digital Media Features – Digital Media and Communication Process.

Unit – II

5 Lecture Hours

New Media Theory: Theory of Information Society – Digital Media and Representation – Digital Media and Identity – Digital Media Literacy.

Unit– III

5 Lecture Hours

New Media and Society: Social Construction of Technology – Digital Media and Nationalism – Digital Media and Public Sphere – IPR, Copyrights Law – Tele-Democracy.

Unit– IV

2.5 Lecture Hours

New Media and Social Movements: Post Feminism – Ethics, Tactical Media, Ubiquity of Code – Digital Culture, Postmodern Identities – Digital Universe and Digital Divide.

UNIT– V

5 Lecture Hours

Digital Media and Technology: Information and Communication Technology (ICT) – Cyber Crime, Slacking – Ethical Hacking – Polyvalence of Media.

UNIT– VI

5 Lecture Hours

Digital Politics: New Media and Politics – Digital Media and Political Economy – New Media and Social Resistance – Post-Humanism.

| Version 1.0 | | 3 | 1 | 0 | 4 |
| Pre-Requisites/Exposure | Basics of animation and gaming | | | | |
| Co-Requisites | - | | | | |

Course Objectives

1. To understand what animation is all about.
2. To practice animation using both 2D and 3D software.
3. To carry out post production for animation.
4. To make the script for games.
5. To practice gaming in 2D.
6. To develop the ability of making games in 3D.

Course Outcomes

On completion of this course, the students will be able to

- CO1. **Define** the process of self-analysis.
- CO2. **Describe** the growth of animation and gaming.
- CO3. **Outline** a personal branding strategy.
- CO4. **Apply** the knowledge of fundamentals of gaming.
- CO5. **Assess** the scope of the gaming industry.
- CO6. **Evaluate** a game script and game programming.

Catalog Description

The course of Animation and Gaming aims to train students as per contemporary advancement through a very robust curriculum in 2D and 3D animation. The course focuses on creative, innovative animation making and professional practice, structurally designed to raise one's creativity up to the industry. It offers great opportunity for creative students to develop creative, innovative and necessary technical skills and the ability to locate individual design approaches within the appropriate professional context. Experts from the field from all across the platform will be called for delivering expert lectures on various aspects of gaming and animation. Workshops will be conducted where the learners will learn the intricacies of animation.

Course Content

Unit I:

5 Lecture Hours

Introduction to the User Animation Industry – History & Storytelling for Animation – Introduction to 2D Image Editing Software for Texture Creation & Matte Painting.

Unit – II

5 Lecture Hours

Self-Knowledge: Personal and Professional Self-Analysis

Elements for Self-Analysis: Knowledge, Skills, Abilities and Values – The Strengths and Weaknesses for Self-Analysis: e.g. Personal – SWOT – Personal Branding Strategy.

Unit– III

5 Lecture Hours

Introduction to Rigging & Animation & Introduction to Post Production Software – Advanced Character Modelling (Low Poly & High Poly) – Advanced Texturing & Lighting.

Unit– IV

5 Lecture Hours

Gaming Fundamentals – Introduction to Gaming & Gaming Industry – Introduction to Game Scripting & Programming.

UNIT– V

5 Lecture Hours

Introduction to Game Art & Elements of Level Designing – Fundamentals of 2D Gaming – Game Maker – Introduction to 3D Gaming – Asset Creation for Game Engine.

UNIT– VI

5 Lecture Hours

3D Game Design Techniques & Prototyping – Business of Digital Game Production.

Practicals:

30 Practical Hours

1. Lessons on 2D Animation.
2. Lessons on 3D Animation.
3. Lessons on Animation Post Production.
4. Lessons on Game Scripting.
5. Lessons on 2D Gaming.
6. Lessons on the Business of Animation and Gaming.

Reference Books:

| Version 1.0 | | 3 | 1 | 0 | 4 |
| Pre-Requisites/Exposure | Journalism Basics | | | | |
| Co-Requisites | - | | | | |

Course Objectives

1. To understand the process of news writing.
2. To understand the process of business news writing.
3. To develop a nose for business news.
4. To plan stories in advance and allocate resources accordingly based on the platform the story is being covered for.
5. To understand the media laws and ethical considerations, effective news coverage requirements and its strategic aspects in the broader media and communication industry.
6. To report on specific issues concerning business, economy and markets.

Course Outcomes

On completion of this course, the students will be able to

- CO1. **Label** the dynamics of the news writing and reporting.
- CO2. **Determine** the styles of writing news for different genres.
- CO3. **Apply** the knowledge concerning the various technicalities of news
- CO4. **Classify** the intricacies of data journalism.
- CO5. **Assess** how to write news stories for media.
- CO6. **Evaluate** platform-agnostic multimedia content.

Catalog Description

News Writing Skills is the entire process involved with the creation of platform-agnostic multimedia news. This essentially concerns the collection of news, the processing of news and the conversion of raw news pieces into final published news stories. In the process, a lot of activities happen – news collection, news editing, news designing and news publication. The course will be delivered through a healthy mix of classroom lectures, practical sessions and on-the-field exercises. In the process, the learners will be exposed to PowerPoint Presentations, printed stories and news case studies. Experts from the field from all across the platform will be called for delivering expert lectures on various aspects of journalism. Workshops will be conducted where the learners will learn the intricacies of journalism by doing. A solid backgrounding in Journalism is a sine-qua-non for any aspiring journalist even if he/ she is going for a career in television, radio or new media journalism.

Course Content

Unit I: 5 Lecture Hours

News Writing and Reporting – Fundamental Rules and Practices of Reporting – Developing and Writing a News Story – Reporting from Press Releases, Press Handouts, Press Conferences and Public Meetings – Exclusive News Stories – Practical Ways to Cultivate Sources.

Unit II: 5 Lecture Hours

An Introduction to Business Journalism – Evolution of Business Journalism over the Ages – Understanding Basic Business, Economic and Financial Terms – Watershed Events in Global and Indian Economy.

Unit III: 5 Lecture Hours

Understanding the Corporate Structure – Reporting for the Stock Markets – Economy and Governmental Reporting.

Unit IV: 5 Lecture Hours

Economic Policy Reportage – Being Good with Numbers – Data Journalism – Gathering News: Formal and Informal Sources – Ethics in Business Journalism.

Unit V: 5 Lecture Hours

Presenting Business News – Understanding the Jargon – Understanding the Audience – Mantras for Business Journalists – Style Issues in Business Journalism – Legal Implications of Wrong Reportage – What Makes Business News? – How Does One Separate a Business News from a Business Non-News.

Unit VI: 5 Lecture Hours

Understanding Business Newspapers in India and Abroad – Business Magazines – Online Business Portals – Business News Channels – Speculative Economic and Business Reportage – Understanding the Drift of Business News.

Practical:

1. Practical on News Writing for the Indian Economy.
2. Practical on News Writing for the Global Economy.
3. Practical on News Writing for the Stock Markets.
4. Practical on News Writing on Policy Issues.
5. Practical on News Writing for the Corporate Sector.
6. Practical on News Writing on Quarterly and Annual Reports of Companies.
7. Practical on Data Journalism.
8. Practical on Business Research.

| HJM11021 | BASICS OF PHOTOGRAPHY | L | T | P | C |
| Version 1.0 | | 5 | 1 | 0 | 6 |
| Pre-requisites/Exposure | Basic knowledge of photography | | | | |
| Co-requisites | - | | | | |

Course Objectives

1. To develop an understanding about various steps involved in photography.
2. To describe the scope and characteristics of photography.
3. To operate a fully manual camera demonstrating how light and time affect photographs.
4. To critique and Explain photographic images (experts and others). Students will study the work of numerous recognized photographers as well as images produced by class members.

Course Outcomes

On completion of this course, the students will be able to;

- CO1. **Define** the dynamics of photography.
CO2. **Explain** the basic rules of imagery.
CO3. **Apply** the knowledge of digital SLR cameras, lighting, postproduction, and printing.
CO4. **Examine** the basics of moving image and cinematography.
CO5. **Determine** the ways of managing a successful photography business.
CO6. **Evaluate** research techniques for documentary subjects or news stories visualized through still and moving images.

Catalogue Description

Photography is one of the most versatile fields in the arts sector. The application of photography is in different fields such as fashion, journalism, entertainment, science etc. Skilled photographers are required in different firms including news agencies, electronic media, modelling agencies, wildlife photography, etc.

Photography courses enable the candidates to understand the utility of different camera parts, working out the lights while clicking pictures and the art of taking candid shots. Other aspects that the candidates can learn from the programme are studio lighting, portrait photography and designing portfolios.

Photography is an ever-blooming field with numerous job opportunities as well as business opportunities. Various media agencies and news agencies hire photographers to post on their news channels, newspapers, magazines and websites. Apart from that, there is a constant demand for aesthetic photographers who can click pictures of landscapes, wildlife and other such themes.

Candidates can also start their own private photo studios to offer portrait clicking and creating portfolios of potential clients.

Course Content

Unit I: **2.5 Lecture Hours**
Brief history of **photography, Anatomy of Digital Camera & its types.**

Unit II: **2.5 Lecture Hours**
DSLR structure and its function, Lens – Types of lens, shutter, shutter speed, diaphragm.

Unit III: **2.5 Lecture Hours**
Depth of Field, Light – Types, Characteristics, Focus, auto-focus, manual focus.

Unit IV: **2.5 Lecture Hours**
Meaning of composition. Elementary rules of composition – Rule of thirds, figures and lines.

Unit V: **2.5 Lecture Hours**
Photographing people; portrait and still, wildlife; environment; sports; landscape

Unit VI: **2.5 Lecture Hours**
What is **photojournalism**? Scope and importance.

Course Objectives

1. To know the history of documentary films.
2. To know the history of corporate films.
3. To know how to make documentary films.
4. To know how to make corporate films.

Course Outcomes

On completion of this course, the students will be able to

- CO1. **Define** the process of documentary and filmmaking.
- CO2. **Describe** the types of documentary.
- CO3. **Outline** the process of pre-production and production.
- CO4. **Apply** the knowledge of communication theories and models with case studies.
- CO5. **Assess** the concept and process of making ad films..
- CO6. **Predict** the outcomes of different documentaries.

Catalog Description

The course documentary and film making focusses at fostering understanding of the history of the genre by the students and they will also make a short documentary film. The aims of the course are to foster an understanding of documentary as a diverse form, with a range of styles and genres, to root this diversity in its various historical and social contexts, and to introduce you to some analytical tools appropriate for study of your own and other filmmakers' works. Experts from the field from all across the platform will be called for delivering expert lectures on various aspects of documentary and filmmaking. Workshops will be conducted where the learners will learn the intricacies of documentary and filmmaking.

Course Content

Unit I: 5 Lecture Hours

Difference between Actuality and Documentary, Documentary and Feature Film, Evolution, Growth and Present Scenario of Documentary Films.

Unit II: 5 Lecture Hours

Documentary Production, Pre-Production, Researching the Documentary, Research: Library, Archives, Location, Life Stories, Ethnography; Writing a Concept: Telling a Story; Treatment; Writing a Proposal and Budgeting.

Unit III: 5 Lecture Hours

Creative Treatment of Actuality: Role of Choosing the Right Subject, Importance of Research and References.

Unit IV: 5 Lecture Hours

Concept and Principles of Ad Films – Role of a Copywriter, Process of Ideation and Visualization, Presentation to Client, Shot Selection and Shot Duration.

Unit V: 5 Lecture Hours

Business Presentation Including Strategy, Gathering an Idea, New Policies, Creating a Tagline, Aesthetics of the Movie, Packing and Production of the Film.

Unit VI: 5 Lecture Hours

The Language of Corporate Cinema, Practical Learning of Software.

Practical: 30 Lecture Hours

1. Documentary.
2. Corporate Film.

| Version 1.0 | | 1 | 1 | 0 | 2 |
| Pre-Requisites/Exposure | Basic knowledge of political system | | | | |
| Co-Requisites | - | | | | |

Course Objectives

1. To understand the Indian political system.
2. To understand the Indian economic system.
3. To know the history of Indian political system.
4. To know the history of Indian economic system.
5. To analyse the socio-political background of contemporary India.
6. To get a general idea of how the Indian state functions.

Course Outcomes

On completion of this course, the students will be able to

- CO1. **Define** the Indian political system.
CO2. **Describe the Indian economic system.**
CO3. **Outline** idea of how the Indian state functions.
CO4. **Apply** the knowledge of influence the media exerts on the economy.
CO5. **Assess** the socio-political background of contemporary India.
CO6. **Predict** the role of NGOs in ensuring economic equity in India.

Catalog Description

Indian Political & Economic System as a course introduces the students to political economy and the socialist economic reforms in India. Explaining economic liberalization in India, the module makes them able to critically analyses the concepts like liberalization, privatization and globalization and development communication. This course focuses on imparting practical skills through workshops and lectures. The workshops will impart the students with the required skills in communication tools and techniques facilitating development.

Course Content

Unit I:

8 Lecture Hours

Understanding Political Economy – Introduction to Classical Liberalism – Welfare Economics – Marxist View – Advent of Neo-Liberalism – Socialism – Gandhian Model of Economy – India's Economic Structure during the British Rule – The Impact of Independence on India's Economy – Nehruvian Socialism – Planning Commission and its Contributions.

Unit II:

8 Lecture Hours

The Socialist Economic Reforms in India – The Nationalization of Banks – The Advent of Permit Raj – Efforts at Industrialization.

Unit III:

8 Lecture Hours

Economic Liberalization in India – Opening up of the Indian Economy – Gradual Transition from Socialism to Capitalism – The Eternal National Debate Concerning Liberalization, Privatization and Globalization.

Unit IV:

8 Lecture Hours

Migration as a Perennial Issue in India –The Impact of the Increasing Influence of Media on the Economy – The Dot-Com Boom – Supposed Cultural Imperialism Due to the Increasing Popularity of Foreign Media – Economic Repercussions of Cultural Imperialism.

Unit V:

8 Lecture Hours

Environmental Activism in India – Opposition to the Construction of Big Dams – Resistance to Industrial Development at the Expense of Agriculture and the Traditional Lives of Various Tribes.

Unit VI:

8 Lecture Hours

India's Role in International Organizations – Debate Concerning the World Trade Organization – Global Arms Race and India's Role – NGOs and Their Role in Ensuring Economic Equity in India.

2. To understand the importance of research in media and communication.
3. To know the different qualitative research approaches.
4. To know the different quantitative research approaches.

Course Outcomes

On completion of this course, the students will be able to

- CO1. **Define** the process of communication research.
- CO2. **Describe** the creation of research design.
- CO3. **Outline** a research plan for the dissertation.
- CO4. **Apply** the knowledge of fundamentals of research.
- CO5. **Assess** the scope of communication research.
- CO6. **Evaluate** a dissertation.

Catalog Description

The primary goals of this course are to help you become a knowledgeable consumer and a limited producer of communication research as you develop skills in gathering, organizing, interpreting and presenting research information using competent and ethically defensible methods. The course introduces students to quantitative and qualitative communication research methods to enable them to become competent evaluators, designers, and authors of research. Also, it teaches the fundamental principles of communication research, providing learners with the knowledge base and experience to answer questions in the practice of professional communication. Experts from the field from all across the platform will be called for delivering expert lectures on various aspects of communication research. Workshops will be conducted where the learners will learn the intricacies of research.

Course Content

Unit I:

5 Lecture Hours

Introduction to Research: Meaning and Concept – Methods of Acquiring Knowledge – Types of Research: Basic-Applied- Descriptive-Analytical-Clinical-Case Study-Historical.

Unit – II

5 Lecture Hours

Elements of Research: Reliability, Validity, Variable, Hypothesis, Scaling, Sampling – Inductive, Deductive – Empiricism, Qualitative, Quantitative – Ethical Dimensions.

Unit– III

5 Lecture Hours

Research Design – Types and Needs-Structure-Component – Experimental and Classic Research Design, Solomon Four Group – Post Test Only Control Group – Quasi Experimental Design – One Shot Case Study.

Unit– IV

5 Lecture Hours

Qualitative Approaches: Audience Ethnography – Talk, Text, Action – Participant Observation, Focus Group – Viewing and Interpreting Image.

UNIT– V

5 Lecture Hours

Quantitative Approaches: Survey Research – Questionnaire Construction – Longitudinal Research-Panel-Trend Study – Content Analysis.

UNIT– VI

5 Lecture Hours

Data Processing and Application: Coding and Tabulation, Analysis and Interpretation, Levels of Measurement – Hypothesis Testing, Frequency Distribution, Standard Deviation, Normal Curve – What to Research and How to Research – Writing a Research Proposal. .

Practicals:

Course Objectives

1. To administer platform-agnostic multimedia journalistic skills in various positions within the broader media and communication industry.
2. To practice informed decision-making in personal and professional journalistic endeavours.
3. To understand what beat reporting is all about.
4. To become specialized reporters for all different kinds of news organizations.
5. To become art reviewers for different news organizations.
6. To become news researchers for various news organizations.

Course Outcomes

On completion of this course, the students will be able to

- CO1. **Label** the dynamics of the news media.
- CO2. **Outline** the various technicalities of journalistic reporting.
- CO3. **Apply** the knowledge concerning the various technicalities of news editing.
- CO4. **Classify** the intricacies of headline writing and intro writing.
- CO5. **Assess** how to write news stories for media.
- CO6. **Evaluate** platform-agnostic multimedia content.

Catalog Description

Specialized reporting is the entire process involved with the creation of platform-agnostic multimedia content. This essentially concerns the collection of news, the processing of news and the conversion of raw news pieces into final published news stories. In the process, a lot of activities happen – news collection, news editing, news designing and news publication. This course provides the students with skills required for specialized reporting on different beats like agricultural, cultural, development, defense, environment, entertainment and many others. This course also aims to teach the students how to write specialized features, editorials and columns.

The course will be delivered through a healthy mix of classroom lectures, practical sessions and on-the-field exercises. In the process, the learners will be exposed to PowerPoint Presentations, printed stories and news case studies. Experts from the field from all across the platform will be called for delivering expert lectures on various aspects of journalism. Workshops will be conducted where the learners will learn the intricacies of journalism by doing. A solid backgrounding in Journalism is a sine-qua-non for any aspiring journalist even if he/ she is going for a career in television, radio or new media journalism.

Course Content

- CO5. **Assess** Corporate Communication (CC) in corporate brand management and creating lasting organizational and brand image.
- CO6. **Evaluate** and implement corporate communication programmes.

Catalog Description

Public Relations (PR) is crucial irrespective of the size of an organization, small, medium or large. Public Relations and more specifically Reputation Management ensure that the stakeholders view the organization more positively.

One of the ways to engage stakeholders is to converse in a way that they understand, appreciate and treasure. Corporate Communication by continuously scanning the internal and external environments of an organization helps the organization and the brand find a niche amidst ever-changing social, political and economic dynamics.

Corporate Communication guides an organization to Evaluate a unique positioning in the psychographics of the target audience by implementing various strategies and tactics. Hence, understanding the media environment, ethical standards, tools and technology are indeed extremely crucial for its practitioners.

PR and Corporate Communication students can start their own agencies or join an organization. Some of the popular jobs that students can look into after pursuing this course:

ADAMAS UNIVERSITY
B.A.(Honours) in Media and Communication
SEMESTER – VI

| | MoJo & Convergence News | L | T | P | C |
|--------------------------------|-------------------------|----------|----------|----------|----------|
| Version 1.0 | | 2 | 1 | 2 | 4 |
| Pre-requisites/Exposure | Basic Knowledge of News | | | | |
| Co-requisites | -- | | | | |

Course Objectives

1. To administer Mobile Journalism or MoJo as a distinct news practice.
2. To understand the uniqueness of the mobile news platform.
3. To analyse the processes involved in gathering and producing news for the mobile platform.
4. To assess mobile news as a perfect embodiment of convergence news.
5. To understand the economic aspects of MoJo in the news gathering and news production process.

Course Outcomes

On completion of this course, the student will be able to

- CO1. **Label** Mobile Journalism or MoJo as a distinct news practice.
- CO2. **Outline** the uniqueness of the mobile news platform.
- CO3. **Apply** the processes involved in gathering and producing news for the mobile platform.
- CO4. **Classify** mobile news as a perfect embodiment of convergence news.
- CO5. **Assess** the content for mobile news.
- CO6. **Choose** the economic aspects of MoJo in the news gathering and news production process.

Course Description

Convergence is the new buzz word in journalism. It is becoming the norm for journalists to write copy, record footage and audio and do live link ups. The internet is providing the platform for all forms of media to come together. The digital age has brought about a fracturing of news audiences and pressure on print and broadcast news to do more with less. The digital era has coincided with the increasing profit mongering of news. Is it better journalism or is it even as good as journalism of decades past? The argument is that MoJos are too busy with getting a right camera angle or looking at the levels to actually report the story properly. They are becoming “a mere pipeline for a public relations feed rather than a critical analyst with the time to pause, reflect and add layers of context to the story”. There are more questions. This course provides the students with the critical overview of the art form that is MoJo.

Course Content

Unit 1: 5 Lecture Hours

The Evolution of Mobile Journalism (MoJo) – The Concept of Mobile Journalists – The Transitory Nature of Content Type in Mobile Journalism.

Unit 1: 5 Lecture Hours

The Evolution of Mobile Journalism (MoJo) – The Concept of Mobile Journalists, Purpose of Mobile Journalism, — The Transitory Nature of Content Type in Mobile Journalism, Story Telling Through Mobile Journalism; Trends of Mobile Journalism in India.

Unit 2: 5 Lecture Hours

Mobile Journalism and the Seamless Blending of Content from Multiple Media Sources: Text, Images, Videos, Audios, Graphics, Animation and the Likes.

Unit 2: 5 Lecture Hours

Mobile Journalism and the Seamless Blending of Content from Multiple Media Sources: Text, Images, Videos, Audios, Graphics, Animation and the Likes. MOJO's Basic Equipment; MOJO & Smartphone, Scope and Reach of Smartphone, Overcoming the Limitations of Smartphone; Mobile Journalism Kit; Challenges faced by Mobile Journalists, Challenges of Mobile Journalism.

Unit 3: 5 Lecture Hours

Mobile Journalism as the Ultimate Cross between Print Media, Electronic Media, Web Media and Social Media.

Unit 3: 5 Lecture Hours

Mobile Journalism as the Ultimate Cross between Print Media, Electronic Media, Web Media and Social Media, Framing and composing Video Shots- Collection of visuals for video News- Organising visual elements into a video story- Production of videos from Photo and script. Editing on Mobile- Use of KineMaster and InShots for video editing.

Unit 4: 5 Lecture Hours

Mobile Journalism, Scanty Resources and Third World Approaches – Voices from the Distant Land.

Unit 4: 5 Lecture Hours

Mobile Journalism, Scanty Resources and Third World Approaches – Voices from the Distant Land. Story Telling through Mobile Journalism, Live storytelling for Mobile Journalists; Citizen Journalism through YouTube; Correlation Between MOJO & Streaming Platforms, Developing a news package on mobile phone.

Unit 5: 5 Lecture Hours

Mobile Journalism as a Fundamental Adversary to the Concepts of Economic Imperialism and Neo-Fascism.

Unit 5: 5 Lecture Hours

Mobile Journalism as a Fundamental Adversary to the Concepts of Economic Imperialism and Neo-Fascism, Theoretical Approaches in Mobile Journalism- Technological Determinism, Uses and Gratification Theory.

Unit 6: 5 Lecture Hours

Mobile Journalism as an Effective Way to Fight Information Mismatch.

Practical: 60 Lecture Hours

1. Gathering and Producing News for the Mobile Platform.
2. Doing Mobile News Photography.
3. Learning Technologies Associated with Mobile News Gathering and Production.
4. Understanding the Concept of Responsive News Websites.

Unit 6: 5 Lecture Hours- 15 Lecture Hours

Mobile Journalism as an Effective Way to Fight Information Mismatch.

Practical:

1. Gathering and Producing News for the Mobile Platform.
2. Doing Mobile News Photography.

Unit I: 2.5 Lecture Hours

Introduction to Photojournalism; History of Photojournalism; Duty of a Photojournalist; Composition – Content, Framing, Backgrounds; Understanding your Lens for News Photography; Captions – How These Short Sentences Can Help Tell Your Story; Techniques of Photojournalism for Newspapers, Magazines, Corporate Communications, New Media and Public Relations; Hard News Photography, Being Ready and Reactive.

Unit I: 2.5 Lecture Hours 10 Hours

Introduction to Photojournalism; History of Photojournalism; Duty of a Photojournalist; Composition – Content, Framing, Backgrounds; Understanding your Lens for News Photography; Captions – How These Short Sentences Can Help Tell Your Story; Techniques of Photojournalism for Newspapers, Magazines, Corporate Communications, New Media and Public Relations; Hard News Photography, Being Ready and Reactive, **Caption writing.**

Project – Photo Story exhibition and Field Photography

Unit II: 2.5 Lecture Hours

Improve Your Photography Techniques; Mirrorless Photography; Mobile Photography; Photo Analysis and Interpretation – The Rules; Photo Selection for Different Types of Publications.

Task: Make a photo motion story.

Unit II: 2.5 Lecture Hours 10 Hours

Improve Your Photography Techniques; Mirrorless Photography; Mobile Photography; Photo Analysis and Interpretation – The Rules; Photo Selection for Different Types of Publications.

Project – Fashion Photo Shoot and Nature Photography Exhibition

Task: Make a photo motion story.

Unit III: 2.5 Lecture Hours

Basic Infographics: Introduction to Info-graphics; What Makes a Successful Info-graphic?; Six Valuable Steps for Planning an Effective Info-graphic; Why Info-graphics Are Effective in the Modern Era? ; How Info-graphics Work Best as Marketing Tools; The Info-graphics as an Integrated Element of Your Company's Digital Marketing Strategy; The Core Message of Your Info-graphic; Your Audience: Who Wants to Know?

Task: 1) plan an Info-graphic and 2) sketch a layout of your Info-graphic.

Unit III: 2.5 Lecture 10 Hours

Basic Infographics: Introduction to Info-graphics; What Makes a Successful Info-graphic? Six Valuable Steps for Planning an Effective Info-graphic; Why Info-graphics Are Effective in the Modern Era? How Info-graphics Work Best as Marketing Tools; The Info-graphics as an Integrated Element of Your Company's Digital Marketing Strategy.

The Core Message of Your Info-graphic; Your Audience: Who Wants to Know

Task: 1) plan an Info-graphic and 2) sketch a layout of your Info-graphic.

Unit IV: 2.5 Lecture Hours

Tools for Making Various Kinds of Info-graphics; Learning Graphics Software; Introduction to Adobe Illustrator; Basic Tool of Adobe Illustrator; Working with Photographs.

Task: Make a basic info-graphic by using photographs.

Unit IV: **2.5 Lecture 10 Hours**

Tools for Making Various Kinds of Info-graphics; Learning Graphics Software; Introduction to Adobe Illustrator; Basic Tool of Adobe Illustrator; Working with Photographs.

Project – Ad Campaign and Social Media Campaign through Graphics design

Task: Make a basic info-graphic by using photographs.

Unit V: **2.5 Lecture Hours**

Common Info-graphic Styles; Diagram Info-graphics; Process Info-graphics; Chart Info-graphics; Timeline Info-graphics; Best Practice for Data Presentation.

Task: Evaluate info-graphics for newspaper.

Unit V: **2.5 Lecture 10 Hours**

Common Info-graphic Styles; Diagram Info-graphics; Process Info-graphics; Chart Info-graphics; Timeline Info-graphics; Best Practice for Data Presentation.

Project – Create a Social Media Campaign/ exhibition for any social message

Task: Evaluate info-graphics for newspaper.

Unit VI: **2.5 Lecture Hours**

Getting Good Ideas; Researching Topics for Different Info-graphic Styles; How to Work with a Team; Finding the Best Data; Info-graphic Content as Journalism; Introduction to Google Fusion; Making Interactive Maps.

Task: Students need to present storyboards for Project II in small groups.

Unit VI: **2.5 Lecture Hours**

Getting Good Ideas; Researching Topics for Different Info-graphic Styles; How to Work with a Team; Finding the Best Data; Info-graphic Content as Journalism; Introduction to Google Fusion; Making Interactive Maps

Project – Pan University Photography exhibition – Photo Story including graphical representation.

Task: Students need to present storyboards for Project II in small groups.

(1) Make Photo essays by using info-graphics (for Print media).

(2) Select a subject and make a graphics package (for audio-visual media).

Practical Lessons **60 Practical Hours**

(3) Make Photo essays by using info-graphics (for Print media).

(4) Select a subject and make a graphics package (for audio-visual media).

| | Live show Production | L | T | P | C |
|--------------------------------|---------------------------------------|---|---|---|---|
| Version 1.0 | | 2 | 1 | 2 | 4 |
| Pre-Requisites/Exposure | Film Studies, Documentary Film making | | | | |
| Co-Requisites | - | | | | |

Course Objectives

1. To understand live show production as a distinct business.
2. To understand the roles and responsibilities of a live show producer.
3. To know how to prepare the proposal for a live show.
4. To evaluate the different logistical considerations for producing a live show.
5. To Assess the perfect ambience for a live show.
6. To be able to learn artist and crowd management for successfully completing a live show.

Course Outcomes

On completion of this course, the students will be able to

- CO1. **Label** the dynamics of live show production.
- CO2. **Determine** the styles of writing for different genres of live programmes.
- CO3. **Apply** the knowledge concerning the various technicalities of live news programs.
- CO4. **Classify** the intricacies of live programme script.
- CO5. **Assess** how to write screenplay for the camera.
- CO6. **Evaluate** content for live show programmes.

Catalog Description

This course introduces the students to the basics of visual reporting skills and editing, graphics and special effects and other concepts like camera positioning, TV News techniques: finding the story, packaging: use of clippings, PTC, VO, AVO, VOXPOP; viewership rating: TAM, TRP, etc. In the process, the learners will be exposed to PowerPoint Presentations, television stories and news case studies. Experts from the field from television will be called for delivering expert lectures on various aspects. Workshops will be conducted where the learners will learn the intricacies of writing for television by doing. A solid backgrounding in writing is a sine-qua-non for any aspiring communicator if he/ she is going for a career in live show production.

Course Content

Unit I: **5 Lecture Hours**

What Is a Live Show? Different Types of Live Shows – Live Show Producers – The Different Kinds of Producers – Live Show Production Techniques.

Unit II: **5 Lecture Hours**

Details – Finding the Right Venue – Contracting Talent – Contract Riders.

Unit III: **5 Lecture Hours**

Personal and Resource Management – Live Sound Reinforcement – Setting up the Lighting Scheme – Sound Checking – Checking Logistics.

Unit IV: **5 Lecture Hours**

Creating and Managing the Budget for a Live Show – Arranging Sponsorships – Arranging Ticketing and Security and Doing Crowd Management.

Unit V: **5 Lecture Hours**

Musical and Artistic Directions While Staging a Live Show – Regulatory and Legal Considerations – Roles of a Producer in Managing a Live Show.

Unit VI: **5 Lecture Hours**

Live Shows and Branding – Branding of Live Shows through the Usage of Social Media – Live Show Crisis Management.

Practical:

1. Lessons on Producing Musical Live Shows.
2. Lessons on Producing Sports Live Shows.
3. Lessons on Producing Plays.
4. Lessons on Producing Lifestyle Live Shows.
5. Lessons on Producing Local Live Shows.

Rules (Common for All Courses with Dissertation as Part of the Curriculum)

In the First Two weeks of the semester, the teacher concerned will revise the Elements of Research and major research methodologies.

Next Two Weeks, learners will be guided to undertake an extensive review of literature to decide on their research topics in accordance with their research interests. In the next Three Weeks, learners will be trained to focus on the topic on the basis of the review of literature and to identify the research gaps. The research gaps will be used to frame the research problem. Once the research problem has been identified, they have to go back to library for another round of exploration of relevant thesis through available e-resources to look for a valid research methodology preferably.

Then, they will be trained to apply appropriate sample size or appropriate qualitative methodologies depending on the topic for next Two Weeks.

Following One Week will be used for pre-test or applying chosen research method on the sample to explore the effectiveness of the research method.

Thereafter, the learners will be asked to complete data collection, tabulation and thesis writing

Course Objectives

1. To become cinema reviewers for various media organizations.
2. To Assess research on cinema.
3. To be able to adopt a career in cinema academics.
4. To encourage the growth of good cinema in the country and elsewhere.

Course Outcomes

On completion of this course, the students will be able to

- CO1. **Define** the process of film making.
- CO2. **Describe** the types and functions of cinema.
- CO3. **Outline** various types of cinema.
- CO4. **Apply** the knowledge of existing theories of film making.
- CO5. **Assess** the scope of cinema as a process.
- CO6. **Predict** the outcomes of different film semiotics.

Catalog Description

This module introduces students to a brief history of cinema (Global and Indian Perspectives), the development of cinema as a distinct art form and what influence the other art forms have on cinema. The module Explains the language of cinema and fundamental cinematic terminologies. Also the students get to know how cinema is a tool for social change. Experts from the field from all across the platform will be called for delivering expert lectures on various aspects of films. Workshops will be conducted where the learners will learn the intricacies of cinema.

Course Content

Unit I:

5 Lecture Hours

Cinematography: Visual Storytelling – Fundamental Techniques of Exposure, Subject Modelling and Set Lighting – The Basic Methods of Moving the Camera – Role of the Director of Photography as Regards Feature Films.

Unit II: 5 Lecture Hours

Direction 1: Roles and Responsibilities of a Director in Script Development, Pre-Production, Production and Post-Production.

Unit III: 5 Lecture Hours

Direction 2: Directing Techniques and Collaboration – Actor’s Approach, Character Analysis, Advanced Blocking, Image Systems and Rehearsal Styles.

Unit IV: 5 Lecture Hours

Post Production: Picture Editing, Sound Editing, Sound Mixing, Music and Color Correction – Procedures and Techniques for Picture and Audio Editing Using Non-Linear Editing Software – The Basics of Visual Effects Editing, Color Correction and Titling.

Unit V: 5 Lecture Hours

Producing: Developing a Concept and Then Selecting Material and Negotiating for the Rights to That Content – The Importance of Networking and Pitching – The Marketing, Distribution and Packaging of a Film.

Unit VI: 5 Lecture Hours

Production Design: Creating and Pitching a Design – Effective Set Decoration Decisions for Zero-Budget Productions – The Basic Principles to Develop a Visual Concept, Design the Set, Evaluate the Budget and Work Together in a Team to Build the Finished Set.

Practical

1. Hands-on Lessons on Doing the Cinematography for a Feature Film.
2. Hands-on Lessons on Developing a Script for a Feature Film.
3. Hands-on Lessons on Directing a Feature Film.
4. Hands-on Lessons on Producing a Feature Film.
5. Hands-on Lessons on Doing the Production Design for a Feature Film.
6. Hands-on Lessons on the Financial Aspects of Producing a Feature Film.

5. To Assess the role media sales play in the overall media businesses.
- ~~6. To evaluate the development of sales process that supports professional media sales.~~
7. To determine the concept of audience as it relates to a medium's target and identify media sales jobs in a marketplace.

Course Outcomes

On completion of this course, the students will be able to

CO1 **Define** the process of media budgeting.

CO2 **Describe** the components of media budgeting.

CO3 **Analyze** cash flow.

CO4 **Assess** conceptual skills in this area as well as their application in the corporate world.

CO5 **Apply** corporate level Policy & Strategy formulations.

CO6 **Evaluate** corporate strategy and synergy in the perspective of budget.

Course Outcomes

Upon completion of this course, the students will be able to

~~CO1 Define the process of media budgeting.~~

CO1 Analyze the market tendency and fluctuation

~~CO2 Describe the components of media budgeting.~~

CO2 Evaluate consumers and their requirements

~~CO3 Analyze cash flow.~~

CO3 Prepare full-proof marketing and media plans

CO4 Assess conceptual skills in this area as well as their application in the corporate world.

CO5 Apply corporate level Policy & Strategy formulations.

CO6 Evaluate corporate strategy and synergy from the perspective of budget.

Catalogue Description

The budget is directly dependent on what factors are influencing these areas.

- People: Questions that can arise include, "Do you need a larger team? Do you need specific skill sets within your team in order to achieve what you feel is the right way to approach it? Do you need to adopt a new process of piece of technology to improve your results?"
- Technology: Technology, particularly in larger teams, really helps to improve efficiency. How you achieve efficiencies is by examining existing and new tools to make sure that the teams are linking in with each other correctly, that they're sharing data and insight correctly and accurately. So, it's important to recognize at what point you need to invest in these should you find reasons to address possible inefficiencies.
- Training: Training must not be overlooked! You should be asking "how much training does your team require? How much do you need to upscale your team?" It's important to recognize this early because it's often something that falls by the wayside. If you find inadequacies, then you should try to remedy this as soon as possible.
- Process: So, what volume and detail are required in your ad buying strategy? If you have a high investment in media, in advertising, in paid ads, what you're going to find is that it's going to require more tools and more people to actually manage that advertising. As you start to increase your efforts into your media buying, content partners or network partners or working with other sites that use display advertising, what you're going to find is that you're going to need more resources to actually manage this. Moreover, you will discover, not just the level of manpower and amount of resources required, but also how much time it will take to monitor and control your digital strategy.

Some of the popular jobs that students can look into after pursuing this course:

- Investor
- Advertising
- Educational Institutes
- Industrial Houses
- Multinational Companies
- Tourism Industry
- Business Consultancies
- Personal Business
- Digital Marketing

Course Content

Unit I (10 hour Lecture Hours)

Nature and Importance of Sales Promotion –Its Role in Marketing – Forms of Sales Promotion: Consumer-Oriented Sales Promotion; Trade-Oriented Sales Promotion and Sales Force-Oriented Sales Promotion.

Unit I (10 Lecture Hours)

Management: Definition, nature, process, functions & skills.

Evolution of management thoughts: F.W. Taylor – Henri Fayol – Max Weber – Elton Mayo

Management Approach: System approach – Contingency approach

Business Organization: Types of ownership

Unit II (10 hour Lecture Hours)

Selling Situations – Types of Sales Person – Buyer Seller Dyad – Diversity of Personal Selling – AIDA Theory in Selling – Peddlers – Professional Sales Person – Peddler vs Professional Sales Person – Industrial Sales Person.

Unit II (10 Lecture Hours)

Organization: Concept and purpose of the organization – Types of organization, Line, Line & Staff, Matrix, Virtual Organization structures. Basis of Departmentation.

Concept of Authority: Functional Authority, Delegation of Authority, Centralization and Decentralization of Authority.

Coordination and Staffing.

Unit III(10 hour Lecture Hours)

Samples –Point of Purchase –Displays and Demonstration – Exhibition and Fashion Shows- Sales Contest and Game of Chance and Skills –Lotteries –Gifts-Offers –Premium and Free Goods – Prince Packs –Rebates –Patronage –Rewards etc. – Conventions –Conference and Trade Shows –Specialities and Novelties –Developing a Sales Promotion Programme –Pre-TestingImplementing, Evaluating the Results and Making Necessary Modification.

Unit III (10 Lecture Hours)

Market Analysis and Selection: Marketing environment – macro and micro components and their impact on marketing decisions – Market segmentation and positioning – Buyer behavior – consumer versus organizational buyers – Consumer decision-making process – Marketing mix

Unit IV (15 hour Lecture Hours)

Consumer and Industrial Markets – Characteristics and Implications for Selling Function – Difference between Organisation and Consumer Behaviour – Organisation Buyer Behaviour – Factors Affecting Organization Buyer Behaviour.

Unit IV (10 Lecture Hours)

Marketing Research: Introduction – Management uses of marketing research – Problem Formulation & steps in decision Making Process.

Research Design: Introduction, Exploratory Research, Descriptive research, Causal/ Experimental Research Design – Relationship between different types of designs.

Unit V(10 hour Lecture Hours)

Concept, Nature, Functions & Importance; Selling vs. Marketing; Marketing Environment: Nature, Types & Strategies to Deal with Internal & External (Micro & Macro) Marketing Environment; Ethical & Social Responsibilities of Marketing.

Unit V (10 Lecture Hours)

Consumer Behavior: Identifying & understanding consumer – Consumer demographics & lifestyles – Consumer needs & desires – Consumer shopping attitude – Consumer decision process

Determinants of Consumer Behavior: Individual Determinants – Group Determinants – Environmental Influences

Unit VI (10 hour Lecture Hours)

Concept, Importance and Basis, Target Market Selection; Market Positioning: Concept & Importance, Market Repositioning; Product Differentiation vs. Market Segmentation; Contemporary Issues in Marketing.

Unit VI (10 Lecture Hours)

Media Planning: Establishing Media objectives – Media Strategies – Media mix – Reach Vs. Frequency – Creative aspects – Budget considerations – Evaluation of Broadcast media – Print media, Support media – Internet and interactive media, etc. – Media campaign planning.

Semester IV

| | Non-Fiction Films | L | T | P | C |
|--------------------------------|---------------------------------|---|---|---|---|
| Version 1.0 | | 4 | 0 | 2 | 6 |
| Pre-requisites/Exposure | Basic Knowledge of Film Studies | | | | |
| Co-requisites | - | | | | |

Course Objectives

5. To know the history of documentary films.
6. To know the history of corporate films.
7. To know how to make documentary films.
8. To know how to make corporate films.

Course Outcomes

On completion of this course, the students will be able to

- CO7. **Define** the process of documentary and filmmaking.
- CO8. **Describe** the types of documentary.
- CO9. **Outline** the process of pre-production and production.
- CO10. **Apply** the knowledge of communication theories and models with case studies.
- CO11. **Assess** the concept and process of making ad films..
- CO12. **Predict** the outcomes of different documentaries.

Catalog Description

The course documentary and film making focusses at fostering understanding of the history of the genre by the students and they will also make a short documentary film. The aims of the course are to foster an understanding of documentary as a diverse form, with a range of styles and genres, to root this diversity in its various historical and social contexts, and to introduce you to some analytical tools appropriate for study of your own and other filmmakers' works. Experts from the field from all across the platform will be called for delivering expert lectures on various aspects of documentary and filmmaking. Workshops will be conducted where the learners will learn the intricacies of documentary and filmmaking.

Unit 1 (15 hours)

Non-fiction film and its historical formulation – Difference between Non-Fiction and Documentary films, First Non-Fiction films of Lumiere Brothers, Soviet Montage non-fictions of Vertov

| |
|---|
| Unit 2 (15 hours) |
| Anthropological Documentary Films of Flaherty, British School of Documentary Films, French New Wave Documentary Films, Night and Fog |

Semester II

| | Advanced Videography | L | T | P | C |
|--------------------------------|--------------------------------|---|---|---|---|
| Version 1.0 | | 0 | 0 | 4 | 4 |
| Pre-requisites/Exposure | Basic Knowledge of Videography | | | | |
| Co-requisites | - | | | | |

Course Objectives

1. Discuss about various camera technique.
2. To describe the process of Lighting technology and their setup.
3. To operate different video, film format cameras and uses of modern light, Hard & Soft Light, Fill light.
4. To develop how to Revealing a scene, Character motivated shot, 30 and 180 degree rule, POV etc, and color.

Course Outcomes

On completion of this course, the students will be able to;

- CO1. **Build** an in-depth knowledge of Cinematography.
CO2. **Develop** an understanding, Videography and LED lighting uses.
CO3. **Demonstrate** the uses of different Camera movement, Camera placement, Shot composition and framing,
CO4. **Apply** the requirement based proper lighting.

Catalogue Description

Cinematography is one of the most effective topic in this course. Lighting play a very essential role in Cinematography. A Cinematographer play a vital role in Television and Film production including audio, video, images, information, interactive media, virtual reality environments. Skilled persons are required in different firms including news agencies, electronic media, film industry, productions houses etc. On the other hand lighting technique create a dramatic situation in a film or a television show.

Cinematography and lighting is an engineering science. As in all engineering science, in Cinematography one of the biggest challenges is to create cost-effective solutions to practical problem by applying scientific knowledge to building things in the service of mankind. Today Cinematography are build via electronic and computer systems but as the definition said it's a medium that's why working in Cinematography can make you learn a lot about other discipline. This course enables the candidates to understand the utility of different tools, working with different technology and use of different film cameras.

Cinematography is an ever-blooming field with numerous job opportunities. Various media agencies, Television channel, film production houses recruit Cinematographer. Following are some of the popular jobs that candidates can look into after pursuing Cinematography courses:

- Cinematographer
- Director of Photography
- Gruffer
- Cameraperson
- Lighting Crew

| |
|---|
| Unit I |
| Introduction to lighting technology including Color Scheme, Uses of Camera technique. |
| Unit II |
| Introduction to various composition of shot, uses of different tools like shutter, F-stop and ISO. Study about different filters, |
| Unit III |
| Introduction LED, HMI, Fluorescent, tungsten light, use of light meter. Camera movement, Different formats of video camera and its uses. |
| Unit IV |
| Experience with film camera and Digital film camera in different situation both studio and outdoor, A-roll, B- Roll shot, 30 and 180 degree rule, |
| Unit V |
| Key Light, Fill light, Low and high key light, fill light, Back light, Uses of indoor and outdoor lighting, and color temperature. |
| Unit VI |
| Special effect using in camera techniques with different film format. |

Modes of Evaluation: Quiz/Assignment/ presentation/ extempore/ Written Examination Examination Scheme:

| Components | Mid Term | Attendance | Class Assessment | End Term |

Semester I

| | Introduction to Media | L | T | P | C |
|--------------------------------|-------------------------------------|---|---|---|---|
| Version 1.0 | | 2 | 0 | 0 | 2 |
| Pre-requisites/Exposure | Basic Knowledge of English Language | | | | |
| Co-requisites | - | | | | |

Course Objectives:

1. To develop the concept of communication and imaginative thinking.
2. Acquainting the students with the newest techniques and formats of different types of communication.
3. Enhancing the potential of the students.
4. Enabling the students to stimulate their thinking and enhance their presentational skills.

Course Outcomes

On completion of this course, the students will be able to

- CO1 **Demonstrate** the various elements of communicative skills
- CO2 **Explain** different theories of communication
- CO3 **Demonstrate** the role of the society in the development of language
- CO4 **Evaluating** spaces of communication to understand the nuances of speech and writing
- CO5 **Improve** imaginative thinking to express ideas.

Catalog Description

English Communication course aims at empowering students with the power of Language by helping them develop the skills of presentation and performance. At the same time an average student gains access to the basics of Grammar and the dynamics of language and message conveyance. Students are encouraged to think with imagination, write or speak with their own linguistic abilities and engage in further reading and conversational styles. They become better acquainted to deal with interviews and screening processes.

| |
|---|
| Unit1 (10 hours) |
| Media and its definition. History of Media – first forms of communication – History and |

| |
|---|
| development of communication. |
| Unit 2 (20 hours) |
| Media and storytelling process: Fiction vs Non-Fiction, Visual vs Aural, Time and Space in various forms of storytelling: Reel Time, Real Time, Ellipsis, Linear Narrative, Circular Narrative, Spiral Narrative, Absolute / Calendar Time, Relative Time |
| Space: Real Space, Filmic Space / Diegetic Space, Non-diegetic Space, Psychological Space, Space and Continuity |
| Unit 3 (10 hours) |
| Painting, Music, Literature and their influence in forms of media. |
| Various forms of media: Print, Radio, Cinema, Television, New Media |
| Unit 4 (20 hours) |
| Question of Representation – from two dimensional to three-dimensional image construction from Renaissance, Depth of Field, Early forms of image creation, Hot media cold media |
| Media Theories: Marxist Media Theory, Gender and Media, Nation and Media, Aristotle’s model, Cultural Imperialism and Media |

Modes of Evaluation: Quiz/Assignment/ presentation/ extempore/ Written Examination Examination Scheme:

| Components | Mid Term | Attendance | Class Assessment | End Term |

| | Videography | L | T | P | C |
|--------------------------------|----------------------------------|---|---|---|---|
| Version 1.0 | | 2 | 0 | 0 | 2 |
| Pre-requisites/Exposure | Basic Knowledge of Visual Images | | | | |
| Co-requisites | - | | | | |

Course Objectives

1. To develop an understanding about various tools of cinematography.
2. To describe the process of lighting technology.
3. To operate different video and film format cameras.
4. To develop an understanding about various steps from basics of photography to cinematography.

Course Outcomes

On completion of this course, the students will be able to;

- CO1. **Build** an in-depth knowledge of Cinematography.
CO2. **Develop** an understanding of basics technology of photography, videography and lighting uses.
CO3. **Demonstrate** the uses of different medium including video, film.
CO4. **Illustrate** the basics of different studio set up.

Catalogue Description

Cinematography is one of the most effective topic in this course. Cinematography is any hardware tools that is used to create, produce, deliver and manage Television and Film production including audio, video, images, information, interactive media, and virtual reality environments. Skilled persons are required in different firms including news agencies, electronic media, film industry, productions houses etc.

Cinematography is an engineering science. As in all engineering science, in Cinematography one of the biggest challenges is to create cost-effective solutions to practical problem by applying scientific knowledge to building things in the service of mankind. Today Cinematography are built via electronic and computer systems but as the definition said it's a medium that's why working in Cinematography can make you learn a lot about other discipline. This course enables the candidates to understand the utility of different tools, working with different technology and use of different film cameras.

Cinematography is an ever-blooming field with numerous job opportunities. Various media agencies, Television channel, film production houses recruit Cinematographer. Following are some of the popular jobs that candidates can look into after pursuing Cinematography courses:

- Cinematographer

- Director of Photography
- Gruffer
- Cameraperson
- Camera Operator
- Chief Assistant Cameraman

| |
|---|
| Unit I: (10 hours) |
| Basic Introduction to lighting technology including Color Scheme, basics of Camera. |
| Unit II: (15 hours) |
| Introduction to operational methods of camera, uses of different tools like shutter, F-stop and ISO. Study about different filters. |
| Unit III: (15 hours) |
| Introduction to Videography. Different formats of video camera and its uses. |
| Unit IV: (10 hours) |
| Introduction to Cinematography. Experience with film camera and Digital film camera in different situation both studio and outdoor. |
| Unit V: (5 hours) |
| Lighting technology and its attributes. Uses of indoor and outdoor lighting, exposure metering. |
| Unit VI: (5 hours) |
| Special effect using in camera techniques with different film format. |

| | Sound | L | T | P | C |
|--------------------------------|----------------------------------|---|---|---|---|
| Version 1.0 | | 2 | 0 | 4 | 4 |
| Pre-requisites/Exposure | Basic Knowledge of Aural Culture | | | | |
| Co-requisites | - | | | | |

Course Objectives

1. To develop an understanding about various steps involved in sound recording.
2. To describe the scope and characteristics of sound recording.
3. To operate a sound recording mixture and editing software.
4. To critique and discuss Dubbing and effect and sound graphics

Course Outcomes

On completion of this course, the students will be able to;

- CO1. **Build** an in-depth knowledge of recording system
- CO2. **Develop** an understanding of Sound recorder, types of microphone, specification of Microphones, sound room.
- CO3. **Demonstrate** the learning sound recording and editing software.
- CO4. **Apply** the basics of music theory and ear training.

Catalogue Description

A sound recording is the reproduction of sound waves into fixed form from which the contents can be heard or communicated again. A sound recording is a separate intellectual property from any lyrics, compositions, poetry, script, or speech that may be embodied within it. In sound recording, dubbing is the transfer or copying of previously recorded audio material from one medium to another of the same or a different type. In filmmaking, the process of adding new dialogue or other sounds to the sound track of a motion picture that has already been shot.

The typical recording studio consists of a room called the "studio" or "live room" equipped with microphones and mic stands, where instrumentalists and vocalists perform; and the "control room", where sound engineers, sometimes with record producers, as well, operate professional audio mixing consoles, effects units, there are various kind of sound like, Vocal, Music, Instrumental, Natural sound, Stereo Sound etc. After recording you have to do the following- Editing, Mixing, Mastering. Before recording any kind of sound we should know the different kind of microphone and application. Dubbing removes the video's original spoken audio track and replaces it with a new one in another language, while retaining the same overall feel of the original. This process is also known as 'revoicing. Few steps to Dubbing-Voice over Script Translation and Localization, Voice Casting for the Dubbing Project, Recording the Translated Script, Syncing the Dubbed Audio.

Sound Engineering is one of the branches of engineering discipline which deals with the study of music, movies and theatre in recording, manipulation, mixing and reproduction. Sound recordists capture all of

the sound on location for a TV programme. ... Sound recordists also work around any issues with background noise, and A professional sound recordist/engineer could work as a

- production mixer boom operator
- production sound assistant
- sound transfer operator
- sound editor
- music editor

A sound engineer could also become an acoustic consultant, designing the acoustics of studios, theatres, auditoriums, conference halls etc.

| | Graphic and Web Designing | L | T | P | C |
|--------------------------------|----------------------------------|---|---|---|---|
| Version 1.0 | | 0 | 0 | 4 | 4 |
| Pre-requisites/Exposure | Basic Knowledge of Visual Images | | | | |
| Co-requisites | - | | | | |

Course Objectives

1. To develop and understanding about various steps of graphic designing.
2. To describe the scope and characteristics of graphic designing.
3. To operate a graphic software and creating design.
4. To develop and understanding brand portfolio.

Course Outcomes

On completion of this course, the students will be able to;

- CO1. **Build** an in-depth knowledge of graphic design and the language of graphic design.
CO2. **Explain** an understanding of the elements and basic rules of graphic design.
CO3. **Apply** the techniques of using software.
CO4. **Discuss** the elements and basic rules of graphic design.

Catalogue Description

Graphic Design is one of the most versatile fields in the arts sector. Graphic design is a craft where professionals create visual content to communicate messages. The field is considered a subset of visual communication and communication design, but sometimes the term "graphic design" is used synonymously. Graphic designers create and combine symbols, images and text to form visual representations of ideas and messages.

Graphic Designing courses enable the candidates to understand fundamentals of graphic design and the language and elements of graphic design. Other aspect of this course is candidates can learn the use of different software.

Graphic designing is an ever-blooming field with numerous job opportunities as well as business opportunities. Various media agencies and news agencies hire designer to post on their news channels, newspapers, magazines and websites. Apart from that, there is a constant demand for aesthetic designer who can create unique poster and illustration about trendy theme other such themes. Candidates can also

start their own design studio. Following are some of the popular jobs that candidates can look into after pursuing graphic designing courses:

- Graphic designer
- Page Designer
- Digital content designer
- Logo Artist
- Freelancers
- Visualize
- Digital Artist

| |
|--|
| Unit 1 (10 hours) |
| Introduction to the Graphic Design: History of Graphic Design; Basics of Design: Learn about design elements – Color, Line, Shape, Space, Texture, Value; learn the principles of design – Balance, Contrast, Emphasis/Dominance, Harmony, Movement/Rhythm, Proportion, Repetition/Pattern, Unity, Variety; Visual & Conceptual Hierarchy in Character Development; Design Strategies in developing Scene; Color Strategy. |
| Unit II: (10 hours) |
| Typography: Anatomy of a letter; Typefaces; Typographic Measurement; Typographic Standards; Typographic Guidelines; learn to create branding for that business including a commercial and magazine ad. |
| Unit III: (10 hours) |
| HTML And Graphics: HTML Tag Reference, Global Attributes, Event Handlers, Document Structure Tags, Formatting Tags, Text Level Formatting, Block Level Formatting, List Tags, Hyperlink Tags, Image And Image Maps, Table Tags, Form Tags, Frame Tags, Executable Content Tags. |
| Unit IV: (15 hours) |
| Image maps: Introduction, Client-Side Image maps, Server-Side Image maps, Using Server-Side And Client-Side Image maps Together, Alternative Text For Image maps, Tables : Introduction To HTML Tables And Their Structure. Frames: Introduction To Frames, Applications, Frames Document, The Tag, Nesting Tag, Placing Content In Frames With The Tag, Targeting Named Frames, Creating Floating Frames, Using Hidden Frames, Frame analysis in Online Job portal. |
| Unit V: (15 hours) |
| XML: Introduction, Anatomy, Document, Creating XML Documents, Creating XML Dtds, XML Schemas, XSL, Mapping of XML ontology for a web site. |
| PHP: Introduction, Server-Side Web Scripting, Installing PHP, Adding PHP To HTML, Syntax And Variables, Passing Information Between Pages, Strings, Arrays And Array Functions, Numbers, Basic PHP Errors / Problems |

2. To describe the scope and characteristics of video editing.
3. To operate a fully editing software used on video edit.
4. To critique and discuss Movies, Documentary, Music Video (experts and others).
Students will study the work of numerous recognized videographers as well as the video produced by class members.

Course Outcomes

On completion of this course, the students will be able to;

- CO1. **Develop** an in-depth knowledge of Audio and video editing.
- CO2. **Build** an understanding of producing bids and managing a successful Video editing business.
- CO3. **Explain** the research techniques for documentary subjects or news stories visualized through Videography and video editing.
- CO4. **Apply** the basics of moving image and cinematography.

Catalogue Description

Video editing is the process of manipulating and rearranging video shots to create a new work. Editing is usually considered to be one part of the post production process — other post-production tasks include titling, color correction, sound mixing, etc.

A good editor will be able to create subtle mood prompts in a video. Techniques such as mood music and visual effects can influence how the audience will react. receiving a brief, and maybe an outline of footage and/or a shot list, script, or screenplay, assembling all raw footage, with camera shots either recorded or transferred onto video tape in preparation for inputting into the computer, inputting uncut rushes and sound, and synchronizing and storing them into files on the computer, digitally cutting files to put together the sequence of the film and deciding what's usable, creating a 'rough cut' (or assembly edit) of the program/film and determining the exact cutting for the next and final stages, reordering and fine-tuning the content to ensure the logical sequencing and smooth running of the film/video, experimenting with styles and techniques including the design of graphic elements.

You may work on a variety of productions, including:

- Commercials
- Corporate training videos
- Feature films
- Music videos
- Television program.

If you join as video editor your future is secure with a good job prospect in the large film study studios, media houses, news channel, and different production house and as a freelancer. There has been increased popularity and demand for video editor in the country as well as the world. The career outlook has been positive in the field of video editing.

2. To describe Interface of 3D application & Basic Modeling.
3. To operate a simple walk cycle using the character rigs.
4. To critique and discuss Fluid simulation & rendering.

Course Outcomes

On completion of this course, the students will be able to;

- CO1. **Build** an in-depth knowledge of equipment, Camera & accessories.
- CO2. **Develop** an understanding of Lighting in Cycles.
- CO3. **Apply** the research techniques for Light Linking, Final Composition.
- CO4. **Create** the Dynamics, Active and Passive Bodies.

Catalogue Description

3D animation is the art of using motion to bring characters, vehicles, props, and more to life within TV shows, films, and games.

It is the process of generating three-dimensional moving images in a digital environment. Careful manipulation of 3D models or objects is carried out within 3D software for exporting picture sequences giving them the illusion of animation or movement. The process of creating 3D animation can be sequentially divided into three phases: modelling – which describes the process of creating the 3D objects within a scene, layout and animation – which describes how objects are positioned and animated within a scene, and rendering – which describes the final output of the.

The course will help you learn and master designing graphics / 3D graphics, modeling and creating animations of products and rendering, using 3D Software You will learn the 3D modeling and texturing as well 3D rendering. A thorough study of this unit will enable you to The Grammar of Visual Design, Animation Concept, Drawing in Motion, Techniques of Animation, Training on Computer Graphic, Modelling, Animation Controls and Character Motion, Texture, Digital Light and Shade, Art of Special Effects, Compositing, Scripting, Storyboarding, Character Development, A different process of 3D modelling, 3D Character Animation Project.

3D character animators may also work in film and video production studios, Gaming Industries, public relations offices, advertising agencies, for software publishers, graphic design firms, computer systems design firms, web.

| Co-requisites | - | | | | |

Course Objectives

1. To develop an understanding about various steps involved in video editing.
2. To describe the scope and characteristics of video editing.
3. To operate a fully editing software used on FCP.
4. To critique and discuss Movies, Documentary, Music Video (experts and others). Students will study the work of numerous recognized videographers as well as the video produced by class members.

Course Outcomes

On completion of this course, the students will be able to;

- CO1. **Build** an in-depth knowledge of Audio and video editing.
- CO2. **Develop** an understanding of producing bids and managing a successful Video editing business.
- CO3. **Explain** the research techniques for documentary subjects or news stories visualized through Videography and video editing.
- CO4. **Illustrate** the basics of moving image and cinematography.

Catalogue Description

Photography is one of the most versatile fields in the arts sector. The application of photography is in different fields such as fashion, journalism, entertainment, science etc. Skilled photographers are required in different firms including news agencies, electronic media, modelling agencies, wildlife photography, etc.

Photography courses enable the candidates to understand the utility of different camera parts, working out the lights while clicking pictures and the art of taking candid shots. Other aspects that the candidates can learn from the programmer are studio lighting, portrait photography and designing portfolios.

Photography is an ever-blooming field with numerous job opportunities as well as business opportunities. Various media agencies and news agencies hire photographers to post on their

news channels, newspapers, magazines and websites. Apart from that, there is a constant demand for aesthetic photographers who can click pictures of landscapes, wildlife and other such themes. Candidates can also start their own private photo studios to offer portrait clicking and creating portfolios of potential clients. Following are some of the popular jobs that candidates can look into after pursuing photography courses:

- Photojournalists
- Fashion & Advertising Photographers
- Wildlife Photographers
- Portrait Photographers
- Feature Photographers
- Fine Art Photographers
- Forensic Photographers
- Freelancers
- Scientific Photographers
- Event Photographers

CO4. **Build** the basics of Studio setup for radio program

Catalogue Description

Radio, sound communication by radio waves, usually through the transmission of music, news, and other types of programs from single broadcast stations to multitudes of individual listeners equipped with radio receivers. Mainly Radio broadcasting is transmission of audio (sound), In terrestrial radio broadcasting the radio waves are broadcast by a land-based radio station, while in satellite radio the radio waves are broadcast by a satellite in Earth orbit.

Radio works by transmitting and receiving electromagnetic waves. The radio signal is an electronic current moving back and forth very quickly. A transmitter radiates this field outward via an antenna; a receiver then picks up the field and translates it to the sounds heard through the radio. Various kind of Broadcasting Radio are AM, FM, Community Radio, Internet Radio or Digital Radio. We introduce the Characteristics of Radio like-Basic Elements of Radio Transmission, Characteristic of Sound and Voice. We familiar with Technology of Radio Broadcasting namely Characteristic and type of microphone, Studio, Control Room, Antenna, Radio Set, Various Kind of Audio Software. We also know about the Formats of radio Broadcasting like-Talk, Interview, Discussion, Drama, Documentary / feature, News and Music. We discuss about Organizational Structure of a Radio station.

Twenty first century is the age of Information, Communication and Entertainment, and Radio play a vital role. There are various kind of opportunities in this field like

- Station Manager.
- Assistant station.
- Manager.
- Sound Editor.
- Program Director-News.

- Sports.
- Talk Show.
- News Anchor
- Studio Manager
- Program Producer
- Program Coordinator
- Sales Manager
- Sound Recordist.
