As part of continuous support to environment, Adamas university has also taken different measures for water conservation within its premises. For this reason, maintenance of water infrastructure and associated distribution system is developed properly by the university towards the sustainable management goal of water resources.

### **Details**

Different water bodies are constructed with the campus of Adamas University. A few of them are quite large. The water bodies remain full to its bank during the monsoon season. To maintain these water bodies a number of handful measures are continuously taken by the university. Like

1. Proper maintenance of the banks of the water bodies with natural substances like bamboo.
2. Proper cleaning of the waterbodies.
3. Restriction on any dumping in and around the water bodies.
